Letters of Transmittal

His Honour the Honourable Dr. Gordon L. Barnhart
Lieutenant Governor
Province of Saskatchewan

May It Please Your Honour:

I respectfully submit the Annual Report of Saskatchewan Finance for the fiscal year ending March 31, 2007.

Pat Atkinson
Minister of Finance
July 15, 2007

The Honourable Pat Atkinson
Minister of Finance

Dear Madam:

I have the honour of submitting the Annual Report of Saskatchewan Finance for the fiscal year ending March 31, 2007.

Respectfully submitted,

Doug Matthies
Deputy Minister of Finance
July 15, 2007

Introduction

The Department of Finance's 2006-07 Annual Report describes the actual results for key actions and performance measures that were published in the 2006-07 Performance Plan, which was released in April of 2006 (available at www.gov.sk.ca/finance/accountability/2006_2007/Finance.pdf).

Reporting on actual year-end results – both financial and performance – compared to the plan released at the start of the year increases accountability to the public. The information in the annual report is tied to the continual implementation of the Government's Accountability Framework.

The Department of Finance's 2007-08 Performance Plan was released with the Provincial Budget on March 22, 2007 (available at www.gov.sk.ca/adx/aspx/adxGetMedia.aspx?DocID=807,802,799,1,Documents&MediaID=1089&Filename=07+Finance.pdf).

Who We Are

The Department of Finance plays a unique role in the affairs of the Province of Saskatchewan. As a central agency, Finance is responsible for advising the Government on financial implications associated with its policy decisions. The Department, with direction from Treasury Board and Cabinet, assists in managing and controlling the finances of the Province to ensure appropriate use of public funds. It maintains a close working relationship with the federal government, other provincial governments and other government bodies within the Province to effectively address financial issues of mutual concern.

The Department of Finance is responsible for receiving the majority of revenues for the Government of Saskatchewan. These include revenues from taxation, transfers from Government entities, such as Crown Investments Corporation of Saskatchewan, and transfers from the federal government. Payments are disbursed through Finance to fund public services such as health care, education and road maintenance. To ensure an increasing level of government-wide accountability, Finance assists departments in maintaining a system of planning, budgeting, measuring and reporting based on Government's Accountability Framework.

Finance also provides services directly to the public through delivery of the Saskatchewan Savings Bonds program, administration of provincial pension plans and employee benefit plans, administration of provincial tax programs including the Provincial Sales Tax, and communication initiatives to keep the public informed about finance-related issues.

As of March 31, 2007, Finance employed 434 people trained in fields ranging from economics and accounting to public policy, human resources, financial administration, commerce, communications and many other skilled and professional fields. Staff are primarily located in Regina, with regional offices in Saskatoon, Prince Albert, Swift Current and Yorkton.

Core Business Areas

The Department provides the Minister of Finance, Treasury Board, Cabinet and the Government with information, analysis, advice and services in eight core business areas.

1. Fiscal and Economic Policy

Finance supports effective government decision making by providing up-to-date information, policy analysis and advice to the Minister of Finance, Treasury Board, Cabinet and government departments. This includes financial and policy advice on budget decisions, updates on the Province's revenue and expense position, as well as information on general economic and social issues. Finance establishes and co-ordinates the budget development process to enable Treasury Board and Cabinet to make effective resource allocation decisions.

The Department is also responsible for working with the federal government on programs such as Equalization, the Canada Health Transfer, the Canada Social Transfer, the Canada Pension Plan, fiscal arrangements concerning First Nations in Saskatchewan and other federal-provincial programs.

As well, the Department houses the Saskatchewan Bureau of Statistics, which reports on provincial and national economic indicators.

2. Comptrollership/Financial Management

Finance assists the Legislature and the Government in controlling and accounting for the receipt and disposition of public money. Through the office of the Provincial Comptroller, the Department develops and maintains the government-wide revenue and expense systems and ensures that effective financial management and accounting procedures are in place. It also prepares and publishes financial accountability reports, including the Public Accounts.

Finance ensures that departments maintain appropriate financial and management controls and are properly accounting for their revenues and expenses.

3. Revenue Operations

Finance administers several provincial government revenue and tax rebate programs. This work involves identifying and collecting tax revenues, conducting audits, issuing tax refunds and providing information related to tax and rebate programs.

4. Treasury and Debt Management

Finance borrows to meet the funding requirements of the Government, including Crown corporations and other government agencies. It manages the provincial debt and the cash position of the General Revenue Fund. It also provides an investment management service for various funds administered by the Government, Crown corporations and other agencies.

5. Government Performance Planning, Measuring, Budgeting and Reporting

Finance works to improve program effectiveness, budgeting, performance measurement and reporting practices across government. It works with departments to develop and implement a "managing for results" approach within Executive Government, to provide analysis and advice to Treasury Board and to undertake analysis of assigned special projects and reviews.

6. Personnel Policy Secretariat

The Personnel Policy Secretariat provides advice, analysis and secretariat support to the Cabinet Committee on Public Sector Compensation and co-ordinates implementation of Cabinet decisions related to its mandate. They are responsible for strategic policy development and analysis on matters related to public sector compensation and management of collective bargaining. The unit collaborates with other officials in the Department of Finance and relevant line departments on financial parameters for collective bargaining and with government organizations in the development of human resource policies that have compensation implications.

7. Corporate Services

Finance provides direction, guidance and support for internal operations and client agencies. This work includes human resources, MIDAS HR/Payroll administration for 16 departments and agencies of government (including Finance), financial services, procurement, security and facilities.

8. Pension and Benefits Administration

Finance, through the Public Employees Benefits Agency (PEBA), administers pension and benefit programs for employees of the Executive Government, Crown corporations and government-funded bodies.

As part of its mandate, PEBA ensures that the plans are administered in accordance with legislation and the prevailing governance system. Plan design is reviewed regularly to ensure that the needs of plan members and employers are addressed.

PEBA's operating costs are charged to each of the plans under its administration as an administrative cost. These costs are reported annually in the Public Employees Benefits Agency Revolving Fund Annual Report.

An annual report is prepared and tabled for each pension and benefit plan under PEBA's administration. For more information, go to www.peba.gov.sk.ca and click on the "publications" link.

2006-07 Fiscal Year Results

2006-07 Results at a Glance

Summary of Performance Results

Key Results

Saskatchewan is fiscally strong and stable

- Achieved a balanced budget in the General Revenue Fund for the 13th consecutive year.
- Government debt to GDP ratio is 15.9 per cent, the lowest ratio in 21 years.

Saskatchewan is a prosperous and socially responsible province

- Implemented legislative amendments to enact the business tax reforms (including the phased elimination of the general capital tax, the gradual reduction of the general corporate income tax rate and the gradual increase of the small business income tax threshold) that were announced in the 2006-07 Budget.
- Provided policy analysis and advice to the Government, leading to the two-point reduction in the Provincial Sales Tax rate on October 28, 2006, the reduction in the small business corporate income tax rate and the realignment of the provincial dividend tax credit structure, as well as the new Graduate Tax Exemption announced in the 2007-08 Budget.
- Saskatchewan's personal taxes are third and fourth lowest in the country for representative families.

Government is accountable for its revenue, expenditure and results

- Released Volume 1 of the 2005-06 Public Accounts on June 29, 2006.
- Improved the integration of financial and non-financial planning and reporting: a total of 21 performance plans were published with the budget in April 2006 and 23 performance-based 2005-06 Annual Reports were released in 2006.

Saskatchewan Finance provides excellent services to its clients

- The Saskatchewan Finance website was enhanced, giving clients the ability to complete a short survey to provide feedback on the information provided in tax bulletins. In addition, the bi-annual client survey was offered through the Internet to minimize the effort required to respond.

Summary of Financial Results

In 2006-07, the Department, excluding pensions and benefits, spent \$41.4 million, up \$0.7 million from the Budget Estimate. Spending for pensions and benefits decreased \$1.6 million from the Budget Estimate of \$219.1 million, due to lower-than-expected employer contributions for pensions and benefits.

In 2006-07, the Department collected about \$6.5 billion in revenue, up \$628.5 million from the Budget Estimate. The increase is primarily due to higher taxation revenue.

The Department of Finance budgeted 463.0 FTEs for the 2006-07 fiscal year. The actual FTEs utilized during the year were 426.8, which is 36.2 under budget. The difference in budgeted versus utilized FTEs is attributed to the addition of new positions in the Provincial Comptroller's Division and Public Employees Benefits Agency, some of which are hard-to-recruit positions and went unfilled.

2006-07 Performance Results

Annual performance information is used to assess overall progress towards goals and objectives each year and, in turn, the results are used to inform or adjust future plans.

The key actions originally presented in Finance's 2006-07 Plan are shown below, followed by the actual progress for each. Actual results information is included for all key actions and performance measures that were published in the 2006-07 Performance Plan. Further information about Finance's performance measures is available in the 2006-07 Performance Plan, which can be found at the following website:

www.gov.sk.ca/finance/accountability/2006_2007/performanceplans.htm

Goal 1 – Saskatchewan is Fiscally Strong and Stable

Objective 1 – A sound financial plan

Fiscal strength and stability are important indicators for those who live in our Province, and those who are looking to invest. The Department contributes to the fiscal strength and stability of the Province by developing and implementing a sound financial plan. Sound financial planning is a key component in assisting government decision-makers to develop and deliver annual budgets and effectively allocate public resources.

Sound financial plans are the result of combining detailed financial and economic information within a framework of appropriate assumptions, methods and processes. The Department of Finance develops the planning framework, implements the financial plan, and keeps the plan updated with current information and analysis.

Principal elements of the Government's financial plan are the annual Budget and subsequent quarterly reports. These documents provide detailed information about revenue and spending plans for the fiscal year, as well as changes to the plan throughout the year. The Department of Finance is responsible for producing economic and fiscal forecasts and financial analysis for the Government's financial plan.

In 2006-07, changes to the Province's financial situation presented financial planning challenges. Higher-than-expected taxation revenue due to a strong economy, as well as higher-than-expected non-renewable resource revenue due to high oil

prices, contributed to a \$900 million improvement in the Government's revenues. The Department helped Government allocate these additional resources to tax competitiveness, government services and debt management for Saskatchewan people.

The largest single component of public expenditures relates to compensation of public sector employees; therefore, working to negotiate collective agreements between public sector employers and their respective unions that are fair to both employees and taxpayers is an ongoing part of a sound financial plan. During 2006-07, the labour relations environment was volatile. Past settlements in the public sector were low compared to other settlements and inflation. This history, coupled with the Province's improving financial picture, made negotiations challenging. The result was a major labour dispute in the public service that resulted in a mediated settlement. The terms of the settlement were within the planning range for 2006-07 but were higher than expected for future years. This settlement is now providing the pattern for other public sector settlements and is forming the basis for financial plans into the future.

Key Results

- Issue timely economic and fiscal forecasts, reports and analysis, as well as fiscal strategies and options, to achieve the Government's financial plan within *The Balanced Budget Act* and *The Fiscal Stabilization Fund Act*. [2006-07 planned result]
 - Economic and fiscal forecasts were provided in the Budget and Mid-Year Financial Report.
 - Throughout the year, Cabinet and Treasury Board were provided with analysis, strategies and options as required.
- On an ongoing basis, operate a budget process that provides decision-makers with realistic program options and the information necessary to analyze those options. [2006-07 planned result]
 - In 2006-07, as in previous years, Finance provided Ministers with detailed, high-quality analysis and recommendations with which they could make well-informed budget and program decisions. Timely decisions were made and the 2007-08 Budget was released on March 22, 2007.

- On an ongoing basis, optimize the Government's cost of borrowing through:
 - strategic financing
 - cash management
 - debt administration and foreign exchange and risk management. [2006-07 planned result]
- The Province borrowed \$1,421.2 million for both the Crown corporation sector and general government purposes. Of this, \$1,164.4 million was raised in capital markets and \$256.8 million was raised through the sale of Saskatchewan Savings Bonds to Saskatchewan residents.
- Issue timely quarterly financial reports to the general public, providing information on the Government's current financial position. [2006-07 planned result]
- The Government issued the First Quarter Financial Report on July 26, 2006, the Mid-Year Report on November 16, 2006, and the Third Quarter Financial Report on February 26, 2007.

Measurement Results

Government Debt to GDP Ratio

Investor confidence is influenced by this ratio because it provides a measure of the Province's debt relative to the size of the economy.

This measurement ties to the goal "Saskatchewan is fiscally strong and stable" by focusing on both the size of the economy and the level of Government debt. One facet of the Government's financial plan is to manage Government debt levels.

The Public Accounts at March 31, 2007 showed a Government debt to GDP ratio of 15.9 per cent, a drop of 0.8 percentage points from the March 31, 2006 level of 16.7 per cent. This is the lowest debt to GDP ratio since March 31, 1986.

Since 1993, Government debt as a percentage of GDP has declined significantly. At March 31, 1993, the debt to GDP ratio was 41.6 per cent, 25.7 percentage points higher than the current ratio.

This ratio is influenced by the state of the global, North American and Canadian economies, as well as the level of government debt.

This ratio is calculated by dividing GDP for the previous calendar year by the level of Government debt at March 31. Debt is gross debt net of sinking funds plus guaranteed debt. Gross debt is the amount owed directly to lenders and sinking funds are funds set aside for the repayment of that debt. Guaranteed debt is the debt of others that the Province has promised to repay if they are unable to do so. Government debt is debt borrowed to finance Government programs as opposed to debt borrowed for, and repayable by, Crown corporations. GDP, or gross domestic product, is the total value of all goods and services produced in the economy. Nominal GDP is used for this calculation.

Government Debt and Guaranteed Debt as a % of GDP

Credit Ratings

A credit rating is an independent evaluation by a recognized objective agency of a borrower's willingness and ability to service and repay debt.

Investors rely on credit ratings when making investment decisions. Many investors have guidelines that are based on credit ratings (e.g., must purchase bonds rated "AA" or higher). Therefore, a borrower's credit rating will impact the availability of credit, both in terms of the number of investors and the pool of funds it can tap.

Since 1995, the Province has received 16 credit rating upgrades as the Province's debt and financial position improved. In 2006-07, the Province received three upgrades:

- to "AA" by Standard & Poor's;
- to "AA1" by Moody's Investors Service; and,
- to "AA(low)" by Dominion Bond Rating Service.

All credit rating agencies now rate the Province at the "AA" level. This is extremely important to international investors, many of whom have a "AA" credit rating requirement for investment.

Factors used to determine the Province's credit rating include Government structure and intergovernmental relations; economic, budgetary and financial performance; policy direction and overall Government management ability.

Credit Ratings for Saskatchewan

Goal 2 – Saskatchewan is a Prosperous and Socially Responsible Province

Objective 1 – A simple, fair, competitive tax structure

A simple, fair and competitive tax structure promotes prosperity, while enhancing social responsibility, by ensuring adequate resources for the delivery of important public services. Competitive taxes are a key feature in Saskatchewan's ability to compete for jobs and investments. However, taxation is only one of many factors that can influence the relative prosperity and social responsibility of the Province.

The tax system's primary objective is to raise the necessary revenues required to finance key public services like health care, education and highways. Tax levels are therefore dependent on the Government's revenue requirements. Saskatchewan's tax levels are held as low as possible while ensuring adequate resources to pay for services and to maintain the financial stability of the Province.

As part of the Government's *Plan for Growth and Opportunity*, and in response to the recommendations of the Business Tax Review Committee, the 2006-07 Budget announced immediate reforms to Saskatchewan's business taxes. The Government's business tax reform initiative enhances the competitive advantages of Saskatchewan businesses by stimulating capital investments, creating jobs and job opportunities for youth and improving the province's overall business climate and attitude. By encouraging economic growth and prosperity, business tax reform ensures a strong provincial revenue base into the future to finance continued investment in key public services. The Department assisted the Government in both the development of the business tax reform measures and in the implementation of these measures.

In addition to the business tax reform initiative, the 2006-07 Budget also announced a new Tool Tax Credit to recognize the high cost of tools required as a condition of employment in qualifying trades. The Department ensured that this initiative was implemented for the 2006 taxation year.

Also in 2006-07, the Government announced a two-point reduction in the rate of the Provincial Sales Tax (PST), from seven per cent to five per cent, effective October 28, 2006. This tax reduction provides annual tax savings of about \$340 million and allows all provincial residents to directly benefit from Saskatchewan's economic prosperity. The Government also announced a reduction in the small business Corporate Income Tax (CIT) rate from 5.0 per cent to 4.5 per cent, effective January 1, 2007, to further improve the tax competitiveness of small businesses. In conjunction with this change, the Government also announced a realignment of the provincial dividend tax credit structure. The Department provided policy analysis and advice to the Government on all of these initiatives, as well as ensuring their timely implementation.

The October 26, 2006 Throne Speech indicated the Government's intention to introduce legislation to ensure that Fuel Tax revenue from the purchase of fuel consumed on-road would be dedicated to funding provincial highways. The Department assisted in the development of the processes to enable this dedication and in the creation of the necessary legislative framework.

Finally, the Department also provided the Government with policy analysis and advice in the development and consideration of the new \$10,000 Graduate Tax Exemption, which was announced in the 2007-08 Budget to improve the financial attractiveness for post-secondary graduates to remain in Saskatchewan.

Key Results

- Eliminate the general Corporate Capital Tax (CCT) by July 2008.
 - Legislative amendments were passed May 19, 2006 to phase down and then eliminate the general CCT. The legislation schedules the changes as follows: from 0.6 per cent to 0.3 per cent as of July 1, 2006, to 0.15 per cent as of July 1, 2007 and elimination of the tax as of July 1, 2008.
- Eliminate the general CCT on new capital investments as of July 2006.
 - Regulatory amendments were passed May 30, 2006 to exempt new capital investments from CCT, effective July 1, 2006.
- Reduce the CCT Resource Surcharge rates beginning July 2006.
 - Legislative amendments were passed May 19, 2006 to phase down the general CCT Resource Surcharge rate as follows: from 3.6 per cent to 3.3 per cent as of July 1, 2006, to 3.1 per cent as of July 1, 2007 and to 3.0 per cent as of July 1, 2008.
 - Regulatory amendments were passed May 30, 2006 to phase down the CCT Resource Surcharge rate for fourth tier oil as follows: from 2.0 per cent to 1.85 per cent as of July 1, 2006, to 1.75 per cent as of July 1, 2007 and to 1.7 per cent as of July 1, 2008.
- Reduce the general CIT rate to 12 per cent by July 2008.
 - Legislative amendments were passed May 19, 2006 to phase down the general CIT rate as follows: from 17 per cent to 14 per cent as of July 1, 2006, to 13 per cent as of July 1, 2007 and to 12 per cent as of July 1, 2008.
- Increase the small business threshold to \$500,000 by July 2008.
 - Legislative amendments were passed May 19, 2006 to increase the small business threshold as follows: from \$300,000 to \$400,000 as of July 1, 2006, to \$450,000 as of July 1, 2007 and to \$500,000 as of July 1, 2008.
- Convert the non-refundable Investment Tax Credit (ITC) for Manufacturing and Processing into a refundable tax credit while extending the carry-forward for unused ITCs previously earned to 10 years.
 - Legislative amendments were passed May 19, 2006 to extend the carry-forward period for previously earned, unexpired ITCs to 10 years and to create a new refundable ITC, effective April 7, 2006.

- Introduce a new Tool Tax Credit for employed tradespersons.
 - Legislative amendments were passed May 19, 2006 to permit the creation of a new Tool Tax Credit. Regulatory provisions were passed January 23, 2007 governing the entitlement to and the calculation of the tax credit, effective for the 2006 taxation year.
- Reduce the PST rate to five per cent.
 - Legislative amendments were passed December 6, 2006 to reduce the PST rate from 7 per cent to 5 per cent, effective October 28, 2006.
- Reduce the small business CIT rate to 4.5 per cent.
 - Legislative amendments were passed December 6, 2006 to reduce the small business CIT rate from 5 per cent to 4.5 per cent, effective January 1, 2007.
- Realign the provincial dividend tax credit to better reflect the provincial CIT rates.
 - Legislative amendments were passed December 6, 2006 to introduce an 11 per cent dividend tax credit rate for “eligible” dividends, effective for the 2006 taxation year, and to reduce the dividend tax credit rate for small business dividends from 8 per cent to 6 per cent, effective for the 2007 taxation year.
- Dedicate on-road Fuel Tax revenue to provincial highway construction and maintenance.
 - Legislative amendments were introduced November 9, 2006 (and passed April 26, 2007) requiring the Government to annually report, beginning with the 2007-08 fiscal year, the amounts of on-road Fuel Tax revenue and highway construction and maintenance spending, and requiring the Government to demonstrate how any excess revenue will be allocated to future year spending.

- Continue to monitor:
 - the tax systems of other jurisdictions; and
 - the revenue requirements of the Government.
- This work is ongoing and is reported to the Minister of Finance and the Treasury Board as part of the annual budget development cycle.

Measurement Results

The performance measures described below attempt to provide an indication of the fairness and competitiveness of Saskatchewan’s personal taxes. The measures are prepared on a calendar year basis to coincide with the typical taxation year for income tax purposes. In 2006, the measures were impacted by the partial-year impact of the reduction in the PST rate from seven per cent to five per cent on October 28, 2006.

The calculations upon which the performance measurements are based are performed by the Department of Finance using internal tax simulation calculations. Each of the measures is based on a determination of combined provincial income and sales taxes payable by representative family profiles.

For each family profile, provincial income taxes are calculated based on the following assumptions:

- each family has two dependent children;
- for the two-income family, one spouse earns 60 per cent of the total income and the other earns 40 per cent;
- the single parent family and the two-income family claim \$3,000 in deductible child care expenses;
- each family claims available basic personal exemptions, dependent child credits and credits for Canada Pension Plan and Employment Insurance contributions; and,
- for the purposes of interprovincial tax comparisons, Quebec’s income tax calculations are adjusted for the child care expense tax credit and the 16.5 per cent federal tax abatement.

In addition, provincial sales taxes are calculated based upon average family expenditure baskets from the *Survey of Family Expenditures in 2002* (Statistics Canada). The sales tax base in each province is identified from the enacting legislation, with total expenditures adjusted to reflect Saskatchewan consumption patterns. Provincial sales taxes are then estimated based on taxable expenditures in each province. Refundable provincial income tax credits designed to reduce the impact of sales taxes are netted from the sales tax calculations.

Income and sales taxes paid by representative taxpayers

Saskatchewan's tax levels for representative taxpayers provide an indication of the amount of after-tax or disposable income available to residents. Declining tax levels are therefore suggestive of improvements in the relative prosperity of residents.

In 2006, income taxes for each of the representative profiles declined as a result of the indexation of the income tax system (the indexation factor for 2006 was 2.2 per cent). In addition, sales taxes declined as a result of the partial-year impact of the reduction in the PST rate in 2006.

Interprovincial tax comparisons for selected average family profiles

Saskatchewan's interprovincial ranking with respect to the tax levels of representative taxpayers is indicative of the competitiveness of our tax system. This measure can be significantly impacted by tax changes initiated in Saskatchewan and by tax changes occurring in other provinces.

Saskatchewan's tax competitiveness relative to other provinces did not change in 2006.

Saskatchewan Income and Sales Taxes Paid by Representative Taxpayers							
	2000	2001	2002	2003	2004	2005	2006
Single parent family earning \$25,000	\$ 862	\$ 691	\$ 619	\$ 560	\$ 515	\$ 466	\$ 382
One-income family earning \$50,000	\$ 5,446	\$ 4,486	\$ 4,284	\$ 4,005	\$ 4,007	\$ 4,124	\$ 4,001
Two-income family earning \$75,000	\$ 7,417	\$ 6,983	\$ 6,721	\$ 6,390	\$ 6,432	\$ 6,656	\$ 6,516

Saskatchewan's Tax Competitiveness Rankings for Representative Taxpayers							
	2000	2001	2002	2003	2004	2005	2006
Single parent family earning \$25,000	5th	5th	4th	4th	3rd	3rd	3rd
One-income family earning \$50,000	5th	4th	4th	4th	4th	4th	4th
Two-income family earning \$75,000	4th	4th	4th	4th	4th	4th	4th

Source: Department of Finance, Tax Simulation Models

Tax progressiveness index

The tax progressiveness index measures relative tax levels between different income levels and provides an indication of how progressive, or fair, the provincial tax system is; the higher the index, the more progressive the tax system. The measure compares the income and sales taxes payable by a one-income family earning \$100,000 with the taxes payable by a one-income family earning \$25,000.

In 2006, the provincial income and sales taxes payable by the higher income family is 26.9 times greater than the taxes payable by the lower income family. The increase from 2005 is caused by both the indexation of the income tax system and by the partial-year impact of the PST rate reduction. This increase in the progressiveness index demonstrates that the combined effect of these two tax measures improved the progressiveness, or fairness, of Saskatchewan's personal tax system.

Saskatchewan's Tax Progressiveness Index						
2000	2001	2002	2003	2004	2005	2006
12.0	15.0	17.1	18.3	20.2	22.4	26.9

Source: Department of Finance, Tax Simulation Models

Number of audits conducted on businesses liable for taxes under the statutes administered by Finance

Number of Audits Conducted on Businesses

Source: Department of Finance, Revenue Division Time Control Tracking System

In 2006-07, 3,874 audits were conducted on businesses paying or collecting taxes administered by Finance. This is lower than the number of audits conducted in 2005-06 (4,232) and in 2004-05 (4,518). The decline is primarily due to a significant turnover in staff and temporary vacancies caused by retirements, employees leaving for other permanent and term opportunities, and other definite leaves of absence (e.g., medical, maternity).

Along with total audits conducted, the number of field audits has fluctuated over the past few years. In 2006-07, the Audit Branch achieved a field audit coverage rate of 3.3 per cent of the tax roll, down from the coverage rates in 2005-06 (4.1 per cent) and 2004-05 (3.9 per cent). This decline reflects the impact of staff turnover. The field audit coverage rate is designed to reflect a level of enforcement that serves to educate taxpayers about their tax responsibilities and promote tax fairness – that is, ensuring that the tax is applied fairly and consistently to all taxpayers.

As noted above, staff turnover can significantly affect the number of audits conducted in any particular year. A reasonable target for the number of audits that will be conducted in 2007-08 is 4,180 audits, which is the average number of audits conducted over the past five years.

The number of audits is derived from the Revenue Division's Time Control Tracking System. The system accumulates the weekly activities from the various work units throughout Revenue Division. The data is driven by weekly timesheets prepared by each employee.

**Goal 3 – Government is Accountable
for Its Revenue, Expenditure
and Results**

**Objective 1 – Effective government financial
reporting**

Continued strong financial reporting is key to strong accountability. Timely, reliable and relevant financial information provides the necessary accounting for receipt and spending of public funds. It provides the public with the means to evaluate government performance.

The Department of Finance prepares the General Revenue Fund (GRF) financial statements and the Summary financial statements, which are released in Volume 1 of the Public Accounts. The Department continues to provide effective government financial reporting through timely, reliable and relevant financial statements.

Key Results

- Develop and implement a work plan to prepare and release the Province's Public Accounts by August 1. [2006-07 planned result]
 - Volume 1 of the 2005-06 Public Accounts was released June 29, 2006.
- Prepare financial statements in accordance with Public Sector Accounting Board (PSAB) standards and work with the Provincial Auditor to resolve differences in opinion. [2006-07 planned result]
 - There were three audit qualifications on the General Revenue Fund's 2005-06 financial statements.
 - In 2005-06, the Summary financial statements received a clean audit opinion for the 13th consecutive year.
- Monitor the activities of the PSAB of the Canadian Institute of Chartered Accountants. Implement new standards as soon as approval to do so is obtained. [2006-07 planned result]

- All PSAB activities are being monitored closely and feedback has been provided to PSAB on documents issued by PSAB for comment.
- All PSAB recommendations have been implemented in the Summary financial statements. One recommendation, recording pensions on an accrual basis, remains unimplemented in the GRF.

In addition to progress made on planned actions, the Provincial Comptroller monitors entities' compliance with tabling deadlines for their financial statements. Pursuant to *The Tabling of Documents Act, 1991*, entities are required to table their statements within 120 days of their year-end.

On behalf of Treasury Board, the Provincial Comptroller provides approval in advance of the tabling of financial statements. Approval of financial statements by the Provincial Comptroller contributes to timely, reliable and relevant financial reporting by Treasury Board Crowns and agencies.

The following table displays the percentage of entities meeting the tabling deadline of 120 days:

Year	Percentage of Entities Meeting Tabling Deadline
2006-07	84%
2005-06	84%
2004-05	81%

Measurement Results

**Date that Volume 1 of the Public Accounts
is released**

Timeliness of the financial statements contributes to the Government's accountability. In 2000, the Government established a practice of tabling Volume 1 of the Public Accounts on or before August 1. Volume 1 of the 2005-06 Public Accounts was released June 29, 2006. The 2004-05 Public Accounts were released July 13, 2005. The following chart shows how timeliness of the Public Accounts has improved over the past 15 years.

Timeliness Trend Release of Volume 1 of the Public Accounts

Source: Saskatchewan Public Accounts

Number of audit qualifications on the Province's General Revenue Fund financial statements and on the Summary financial statements

Reliability of the financial statements contributes to the Government's accountability. Financial statements with few (or no) audit qualifications are considered more reliable than those that have many.

The General Revenue Fund financial statements and the Summary financial statements are reliable. Although the Department has some ability to resolve issues on which the Provincial Auditor believes qualifications are necessary, the Provincial Auditor expresses an independent opinion on the statements. Professional judgment is involved due to the complexity of the issues.

The General Revenue Fund's 2005-06 financial statements had three audit qualifications (2004-05 financial statements: three audit qualifications). The first audit qualification for 2005-06 relates to the treatment of transfers between the GRF and the Fiscal Stabilization Fund. The Province records this transaction in accordance with legislation. The second relates to valuation of a loan to the provincial crop insurance

corporation. The Province relies on the opinion of an independent actuary that the program is actuarially sound. The third relates to the pension liability that is disclosed in the notes rather than accrued on the statements. These qualifications have appeared in previous years' audit opinions.

There were no qualifications on the Summary financial statements for 2005-06. The Summary financial statements have received a clean audit opinion since 1993-94.

Number of Public Sector Accounting Board (PSAB) standards that have not been implemented in the General Revenue Fund financial statements and in the Summary financial statements

Relevance of the financial statements contributes to the Government's accountability. Financial statements that comply with PSAB standards are considered more relevant than those that do not.

The General Revenue Fund financial statements and the Summary financial statements are relevant. All PSAB recommendations have been implemented in the Summary financial statements for 2005-06. One recommendation, recording pensions on an accrual basis, remains unimplemented in the GRF for 2005-06. The Government's GRF financial statements continue to disclose the pension liability in the notes and expense actual cash payments to retired plan members and cash contributions to its pension plans.

During the year, PSAB continued its work on a large project to revise the recommendations related to government transfers (grants). Transfers represent the single largest expense of governments. There are currently differences in accounting treatment for transfers across jurisdictions, as well as widespread disagreement on the appropriate treatment between financial statement preparers and auditors. The results of this project could have a significant impact on the timing of transfer expenses and revenues for governments. During the year, PSAB's progress on this project has been closely monitored and feedback provided on various documents issued for comment.

Objective 2 – Effective government-wide financial management practices

Effective government-wide financial management practices are essential to the operation of government. The Department of Finance is committed to a high standard concerning financial systems and practices for managing public resources and achieving fiscal accountability. The Department provides direction to and works with other departments and agencies to ensure appropriate financial management practices are employed.

Departments and Treasury Board Crowns are required to report all losses of public money or property over \$500 to the Provincial Comptroller. Beginning in 2005-06, the Provincial Comptroller began providing quarterly information on public losses to the Standing Committee on Public Accounts.

Key Results

- Through our cyclical risk analysis process, we plan to assess the internal controls on approximately 140 financial programs/systems. Where improvements are required, effective solutions will be recommended for implementation. [2006-07 planned result]
- For the fiscal year 2006-07, we have assessed the internal control risk on 126 financial programs/systems. This number is lower than projected because of staff shortages in the Internal Audit Branch. All detected significant internal control weaknesses have been or are being adequately addressed.

Measurement Results

Number of significant deficiencies that were detected but not appropriately addressed by the affected departments

In order to achieve the objective of effective government-wide financial practices, departments must appropriately address all significant deficiencies that are detected. A significant deficiency is an internal control deficiency that adversely affects the Government's ability to safeguard its assets and record, process or report financial data reliably. Finance develops and

implements financial policies and procedures and conducts internal control reviews to monitor for significant deficiencies in financial programs/systems. This measure will indicate if any significant deficiencies that were detected were not appropriately addressed.

During the past five years, the affected departments appropriately addressed all detected significant deficiencies.

Source: Department of Finance, Internal Control Reviews

Objective 3 – Effective performance planning, management and reporting

The key means by which Finance is pursuing this objective is continued implementation of Government's Accountability Framework (www.gov.sk.ca/finance/accountability/default.htm). A rigorous planning, performance measurement and reporting process provides the foundation for enhanced accountability from departments back to decision-makers and the public. It ensures that departments remain focused on the needs and expectations of the people they serve and increases public understanding of government's plans and, at year-end, its financial and non-financial results.

Executive Government departments and some Treasury Board agencies are now engaged in a regular process of releasing plans at the start of the year that outline the results they intend to achieve and how they will spend their funds. At year-end, these agencies are expected to report on the status of key actions, public commitments, performance measures and financial results in a balanced and rigorous way.

To be effective, performance plans and annual reports must be timely, complete and accurate.

Reporting is timely – department performance plans are released with the Budget; department annual reports are released within 120 days of the end of the fiscal year; a mid-year progress report on key government budget commitments is included in the annual Mid-Year Report; and all plans and reports are available on the departments' websites at the time of their release.

Reporting is more complete – performance planning and reporting includes more government entities and more complete information within both plans and reports. With departments and agencies

releasing performance plans with the Budget and annual reports after the close of the fiscal year, Members of the Legislative Assembly (MLAs) and the public have more information about what these organizations planned to achieve and what they actually achieved during the year.

Reporting is more accurate – Finance continues to encourage departments to ensure their performance reporting is accurate by providing guidance on data collection and validity and by suggesting improvements to how performance measures are reported.

As the lead department in this system of planning, measuring and reporting, Finance works to build capacity within government, sets expectations and supports departments in their planning and measurement work.

Key Results

- Review options to include program assessment to complement the Accountability Framework. [2006-07 planned result]
 - Finance continues to work with departments to identify current and ongoing program assessment activity and encourages departments to utilize this information in their performance plans, annual reports and through the budget development process. Work continues on how to integrate a more formal implementation of program assessment and review into the planning and budgeting process.
- Pursue options for continued streamlining of performance management and reporting processes. [2006-07 planned result]
 - In 2006-07, the Performance Management Branch (PMB) provided flexibility on the structure of the documents and deadlines and provided clear expectations for the performance plans and annual reports by: publishing specific content requirements, identifying best practices, and offering advice and assistance to client departments.
 - PMB facilitated central production of the performance plans for release with the Budget, simplified the review and approval process, and provided timely access to the documents by posting the documents centrally on Finance's website.
- Continue to examine accountability processes in other jurisdictions to assess best-practices in results-based reporting. [2006-07 planned result]
 - PMB continues to examine alternate models of performance planning and reporting that exist in other jurisdictions, including models used by other provinces and the federal government in Canada, at the state and federal levels in the United States, and in other international jurisdictions. PMB continues to consult with the Canadian Comprehensive Audit Foundation (CCAF) and the Provincial Auditor in their ongoing review of accountability processes.
- Participate in or lead special projects and reviews. [2006-07 planned result]
 - In 2006-07, PMB assessed the use of risk management processes within departments and facilitated the integration of risk assessment into the planning and budgeting process for a small number of departments on a trial basis. PMB continues to review best practices and is considering options for government-wide implementation of enterprise risk management.
 - Finance collaborated with several departments to review various programs, made recommendations for program improvement, and examined ways to improve the planning and budget development process.
- Continue to provide support for improved content in departments' public reports. [2006-07 planned result]
 - The Provincial Auditor undertakes an annual assessment of the performance plans and annual reports to evaluate how well these documents align with Finance's stated expectations. Each year, PMB reviews the previous cycle and revises the content requirements to ensure the following year's plans and annual reports are improved. PMB incorporates, where possible, the Provincial Auditor's suggestions and recommendations, balancing departmental capacity and readiness to advance key elements of the Accountability Framework.

- A key change in the Content Requirements for 2007-08 Performance Plans required departments to include detailed trend-line information for all established performance measures. All departments complied with this requirement and the result was better performance data, which provided greater context and historical information, and increased the public's understanding of departments' progress on the measures.

Measurement Results

Number of departments and Treasury Board Crown corporations that publicly release performance plans

Number of departments and Treasury Board Crown corporations that publicly release performance results reports

A total of 21 departments and agencies released 2006-07 Performance Plans with the Budget. In response to the government re-organization announced by Cabinet in February 2006, the Departments of Advanced Education and

Employment, Learning, Community Resources and Regional Economic and Co-operative Development took on new responsibilities and were therefore unable to produce their performance plans to be released with the 2006-07 Budget.

A total of 23 departments and agencies released 2005-06 Annual Reports in 2006, reporting back on the performance plans they released with the 2005-06 Budget.

All of these documents can be accessed through individual department or agency websites or through the Finance website at www.gov.sk.ca/finance/accountability/default.htm

The performance management cycle – release of performance plans at the start of the year and annual results reports following the end of the year – is now well established. Tracking the number of departments and agencies that have moved to a performance planning and reporting approach is important in the early stages, but now that implementation is largely complete, the results for these measures are anticipated to stay relatively stable, with limited annual growth.

Goal 4 – Saskatchewan Finance Provides Excellent Services to Its Clients

Objective 1 – Accurate and timely information and services

The Department is committed to serving its clients – individuals and businesses, government departments and decision-makers, and the public at large – with integrity and professionalism.

During 2006-07, the Department responded to individuals' questions and requests about tax information promptly while processing their refunds efficiently.

Key Results

- Conduct and report survey results for businesses collecting taxes. [2006-07 planned result]
 - The survey is conducted bi-annually. A survey was conducted in 2006-07 resulting in 89 per cent client satisfaction with the Department's quality of service.
 - The next survey will be conducted in 2008-09.
- Respond to most requests for tax information within 24 hours and provide accurate information. [2006-07 planned result]
 - This action was met on a consistent basis.
- Process tax refunds within 21 days of receiving all required documentation. [2006-07 planned result]
 - Over 99 per cent of 2006-07 tax refunds occurred within the 21-day period.

Measurement Results

Per cent of businesses, which collect taxes on behalf of Government, that are satisfied with the Department's quality of service

In 2002-03, the Department committed to conducting bi-annual client satisfaction surveys of businesses collecting taxes on behalf of Government. This allows businesses to evaluate the Department's performance and helps the Department determine how its timeliness of responses, refunds and adjustments may be improved.

Quality of service is the reported level of client satisfaction with the Department's performance, including ease of obtaining tax information, helpfulness of staff, usefulness of tax bulletins and Internet site, ease of filing returns, and timeliness of responses. The Department initially surveyed two groups of businesses using two surveys (audit and non-audit). Non-audit surveys were sent to a random sample of businesses that collect Provincial Sales Tax, Fuel Tax, Tobacco Tax, and Corporation Capital Tax. Audit surveys were sent to a random sample of businesses the Revenue Division had recently audited within a year of the date that the survey was conducted. The results of the two surveys were weighted, combined, and reported as an overall measure of quality of service.

In reviewing the 2004 client satisfaction survey, the Provincial Auditor made several recommendations to improve the process used to measure client satisfaction. It was recommended that Revenue Division seek expert advice in planning the survey; that the results of the two surveys (audit and non-audit) be reported separately; and, that Revenue Division be more aggressive in seeking responses or exclude those groups with less than a 20 per cent response rate. Further, there were concerns that the results of the non-audit survey were being reported as two separate measures.

As a result, expert advice was sought in planning the 2006-07 survey and several changes were made in approach and methodology from the 2004-05 survey. The survey of quality of service and timeliness of responses, refunds and adjustments is collected in one survey and the results are being reported in one quality of service performance measure. A larger sample of businesses was used, clients were provided the option of responding through the Internet, the number of questions was reduced from seven to five and the number of response choices was reduced from seven to five. The survey of businesses audited has been removed from the bi-annual survey and is being conducted on a regular basis and used as an internal quality control measure.

The 2006-07 client satisfaction survey was conducted by the Department of Finance in September 2006. Surveys were sent to 548 businesses with a response rate of 36 per cent (a 68 per cent increase in responses from 2004).

The results of the non-audit survey indicated that 89 per cent of businesses that collect taxes on behalf of the Government are satisfied with the Department's quality of service. The 2004 satisfaction rating was originally reported as 96 per cent, which combined the results of the Audit Survey and Non-Audit Survey. The 2004 satisfaction rating has been restated as 94 per cent to include only the Non-Audit Survey results and to exclude the Audit Survey results in order to provide a more accurate comparison. When comparing the results of the 2006 survey with 2004, it is important to note that the higher number of surveys sent in 2006 relative to total tax filers and the higher response rate in 2006 provide more reliable results which may differ from those obtained from the 2004 survey.

Per cent of businesses, which collect taxes on behalf of government, that are satisfied with the Department's timeliness of responses, refunds and adjustments

In 2002-03, the Department committed to conducting bi-annual client satisfaction surveys of businesses collecting taxes on behalf of Government. This allows businesses to evaluate the Department's performance and helps the Department determine how its timeliness of responses, refunds and adjustments may be improved.

Quality of service is the reported level of client satisfaction with the Department's performance, including ease of obtaining tax information, helpfulness of staff, usefulness of tax bulletins and Internet site, ease of filing returns, and timeliness of responses. The Department initially surveyed two groups of businesses using two surveys (audit and non-audit). Non-audit surveys were sent to a random sample of businesses that collect Provincial Sales Tax, Fuel Tax, Tobacco Tax, and Corporation Capital Tax. Audit surveys were sent to a random sample of businesses the Revenue Division had recently audited within a year of the date that the survey was conducted. The results of the two surveys were weighted, combined, and reported as an overall measure of quality of service.

In reviewing the 2004 client satisfaction survey, the Provincial Auditor made several recommendations to improve the process used to measure client satisfaction. It was recommended that Revenue

Division seek expert advice in planning the survey; that the results of the two surveys (audit and non-audit) be reported separately; and, that Revenue Division be more aggressive in seeking responses or exclude those groups with less than a 20 per cent response rate. Further, there were concerns that the results of the non-audit survey were being reported as two separate measures.

As a result, expert advice was sought in planning the 2006-07 survey and several changes were made in approach and methodology from the 2004-05 survey. The survey of quality of service and timeliness of responses, refunds and adjustments is collected in one survey and the results are being reported in one quality of service performance measure. A larger sample of businesses was used, clients were provided the option of responding through the Internet, the number of questions was reduced from seven to five and the number of response choices was reduced from seven to five. The survey of businesses audited has been removed from the bi-annual survey and is being conducted on a regular basis and used as an internal quality control measure.

The 2006-07 client satisfaction survey was conducted by the Department of Finance in September 2006. Surveys were sent to 548 businesses with a response rate of 36 per cent. The results indicated that 89 per cent of the businesses are satisfied with the Department's timeliness of service regarding refunds and adjustments. This compares with a 93 per cent satisfaction rate in the 2004-05 client satisfaction survey. When comparing the results of the 2006 survey with 2004, it is important to note that the higher number of surveys sent in 2006 relative to total tax filers and the higher response rate in 2006 provide more reliable results which may differ from those obtained from the 2004 survey. Forty-six per cent more surveys were sent in 2006 than 2004, with a resulting increase in responses to the 2006 survey of 68 per cent.

Objective 2 – Ease of tax compliance

Streamlining regulatory compliance enables Saskatchewan businesses and farmers to focus resources on productive activities that enhance their overall competitiveness.

During 2006-07, Finance made considerable progress toward this objective. The Department's electronic services were promoted to businesses and farmers on a quarterly basis. This resulted in a 7.8 per cent increase in the number of businesses using the Saskatchewan Electronic Tax Service (SETS), and a 4.5 per cent increase in the number of farmers using SETS.

Opportunities exist to further develop SETS and enhance electronic reporting. Over the coming year, Finance will continue its efforts to reduce regulatory compliance and meet client service delivery goals.

Key Results

- Continue to promote the Saskatchewan Electronic Tax Service (SETS) to clients through the use of information stuffers included with tax returns every three months, using e-mail marketing to clients that have provided an e-mail address and through our link on the www.gov.sk.ca "On-line Services" web page. [2006-07 planned result]
 - Information stuffers promoting SETS were included with tax returns every three months and our information bulletin subscription service is offered on our website.
 - An additional information stuffer, encouraging clients to use SETS, was included with tax returns during the SGEU job action that affected revenue processing.
 - Inquiry and field staff promoted SETS and information availability on our website and through client interaction and information.

Measurement Results

Per cent of tax payments processed electronically

Source: Department of Finance, Revenue Division Statistical Reports

Previous reports measured the number of businesses that filed returns on-line. The measure was determined from statistical reports generated from the SETS system. SETS was introduced in September 2001 to offer businesses a secure, fast, and convenient alternative to filing and paying tax returns in paper format. The service is available for most revenue and refund programs administered by the Department including: Provincial Sales Tax, Liquor Consumption Tax, Tobacco Tax, Fuel Tax, Corporation Capital Tax (instalment payments only), Insurance Premiums Tax, Beverage Container Program, and the International Fuel Tax Agreement.

The Department uses the percentage of tax payments processed electronically as a measure of performance in meeting its objective of streamlining regulatory compliance. Businesses that use electronic methods to make payments are able to save time and money on regulatory compliance and channel their resources to other business activities. The measure is determined from statistical reports generated from the main revenue system.

In 2006-07, 97,020 payments were processed electronically. This is a .16 per cent increase over the 2005-06 result using the same measure.

Payments made electronically:

Year	# of Payments	Per Cent
2002-03	78,970	44.5
2003-04	85,912	48.6
2004-05	87,014	49.4
2005-06	96,858	54.8
2006-07	97,020	54.8

The Department influences this performance measure by offering additional services, enhancing existing services and continuing to encourage businesses to use SETS. Extending the electronic services offered by the Department does not assure take-up. A balance is required to ensure the electronic services offered meet the needs of Saskatchewan businesses.

Number of farmers that applied for fuel tax permit renewals on-line

Number of Farmers Using SETS

Source: Department of Finance, SETS

SETS was enhanced in February 2002 to offer farmers, commercial fishers, loggers, and trappers a secure, fast, and convenient alternative to filing their Fuel Tax exemption permit renewal in paper format. Ongoing enhancements to SETS are part of continuing efforts by the Department to reduce regulatory burden and meet our goal of providing excellent service to our clients.

The number of farmers that filed permit renewals on-line measures the Department's performance in meeting the objective of ease of tax compliance. The measure is calculated from the SETS database of those who apply for permit renewals for each renewal period. Applicants are primarily farmers but also include 37 commercial fishers, loggers and trappers.

In 2006-07, 8,741 farmers filed rebates or permit renewals using SETS (there are approximately 45,000 active permit holders in the program). This is a 4.5 per cent increase over the 2005-06 result. This increase is related to the efforts made promoting the service. Farmers using SETS are able to save time and money on regulatory compliance, instead of channeling their resources from other business activities.

The Department influences this performance measure by offering additional services, enhancing existing services, and continuing to encourage farmers to use SETS. Extending the electronic services offered by SETS does not assure take-up. A balance is required to ensure the services offered through SETS meet the needs of Saskatchewan farmers.

2006-07 Financial Results

Expense

The following table outlines information on budgeted and actual expenses by subvote and subprogram. Variance explanations are provided for all changes greater than \$100,000.

Program	(thousands of dollars)			Notes
	2006-07 Budget	2006-07 Actual	2006-07 Variance	
Central Management and Services	\$ 6,731	\$ 8,310	\$ 1,579	1

Total	\$ 259,862	\$ 258,964	\$ (898)	

- 1 Higher-than-anticipated ITO service costs, including shared application charges. Additional hirings and overtime were required in the payroll unit due to the implementation of MIDAS HR. Additional communications costs due to 2005-06 Budget tabled in April, as well as an Equalization advertising campaign conducted in 2006-07.
- 2 Reduced bank charges.
- 3 Delayed staffing. The Department is pursuing a salary market competitiveness review for certain hard-to-recruit positions.

- 4 Vacancy management.
- 5 Write-offs higher than estimated.
- 6 Unscheduled payments.
- 7 New PSSP retirees earning more than retirees terminating.
- 8 Salaries across government were lower than estimated, offset by increased cost due to new collective agreement. Lower actual salaries were influenced by recruiting challenges across government due to tight labour markets.
- 9 Increased capital requirements.
- 10 Adjustment for actual capital cost in 2005-06.

Revenue

The Department of Finance collects revenue relating to taxation, transfers from other government entities, interest, premium, discount and exchange, motor vehicle fees, transfers from the Government of Canada, as well as other smaller revenue sources. All revenue collected is deposited into the General Revenue Fund. The following table and text shows estimated and actual revenue, describes the Department's revenue sources and includes variance explanations for changes greater than \$5 million.

Source	(thousands of dollars)		
	2006-07 Budget	2006-07 Actual	2006-07 Variance

Total Department of Finance Revenue	\$ 5,846,311	\$ 6,474,841	\$ 628,530

Corporation Capital Tax

Corporation Capital Tax (CCT) consists of the normal Capital Tax, which is levied on the amount of paid-up capital in excess of \$10,000,000. An additional exemption of up to \$10,000,000 is available to corporations depending on the proportion of total wages and salaries that are paid in Saskatchewan. The CCT also levies a Resource Surcharge based on the value of resource sales.

On July 1, 2006, the general CCT rate was lowered from 0.6 per cent to 0.3 per cent as the first stage of a planned elimination of the general CCT for all corporations, other than provincial Crown corporations and financial institutions. For new capital investments, the general CCT was eliminated as of July 1, 2006.

In conjunction with the reduction in the general CCT, the CCT Resource Surcharge general rate was reduced from 3.6 per cent to 3.3 per cent, while the special fourth-tier rate was reduced from 2.0 per cent to 1.85 per cent.

In 2006-07, CCT revenue increased \$86.4 million, or 20.2 per cent, from the Budget Estimate. The increase occurred in the Resource Surcharge component and is largely due to higher-than-anticipated oil prices.

Corporation Income Tax

Corporate Income Tax (CIT) is administered on the Province's behalf by the federal government using a common national determination of corporate taxable income. For a particular taxation year, the federal government makes instalment payments to the Province on the basis of estimates, which are reconciled to actual assessments once tax returns for that taxation year have been filed.

On July 1, 2006, the CIT general rate was lowered from 17 per cent to 14 per cent as part of Business Tax Reform and the small business income threshold was increased from \$300,000 to \$400,000. On January 1, 2007, the small business general tax rate was lowered from 5.0 per cent to 4.5 per cent.

CIT revenue increased \$192.6 million, or 53.3 per cent, from the Budget Estimate. The increase from Budget is primarily due to much stronger-than-anticipated assessments for the 2005 taxation year.

Fuel Tax

Fuel Tax is levied on purchases of all types of fuel under the authority of *The Fuel Tax Act, 2000*. Saskatchewan provides an 80 per cent exemption for farm-use diesel fuel and unleaded gasoline purchased at bulk-fuel dealers, as well as for the use of diesel fuel by primary producers in their off-road activities. First Nations retailers are also eligible to receive a refund of the Fuel Tax on eligible on-reserve purchases by First Nations individuals.

Fuel Tax revenue increased \$12.3 million, or 3.3 per cent, from the Budget Estimate. The increase is primarily due to higher-than-expected fuel consumption, particularly ethanol-blend and diesel, and lower-than-budgeted First Nations rebates.

Individual Income Tax

Saskatchewan's Individual Income Tax is administered on the Province's behalf by the federal government using a common national determination of taxable income. For a particular taxation year, the federal government makes instalment payments to the Province on the basis of estimates, which are reconciled to actual assessments once tax returns for that taxation year have been filed.

Individual Income Tax revenue increased \$174.5 million, or 11.7 per cent, from the Budget Estimate. The increase from Budget is due to higher-than-anticipated assessments for the 2005 taxation year and higher-than-budgeted instalment payments as the result of a significant upward revision in the forecast of expected taxable income growth in 2006.

Sales Tax

Sales Tax includes revenue from the Provincial Sales Tax (PST) and the Liquor Consumption Tax (LCT). The PST rate, which was lowered from 7 per cent to 5 per cent on October 28, 2006, is a sales tax applied to certain goods and services, while the LCT rate is 10 per cent tax on the total selling price of beer, wine and spirits.

Sales Tax revenue decreased \$17.2 million, or 1.6 per cent, from the Budget Estimate. The decrease is primarily due to the foregone revenue associated with the PST rate reduction, estimated at \$136.1 million. This decrease was offset by stronger-than-anticipated economic activity in most sectors of the Saskatchewan economy.

Tobacco Tax

The Tobacco Tax is levied on retail purchases of all types of tobacco under the authority of *The Tobacco Tax Act, 1998*. A major component of Saskatchewan's Tobacco Tax is the refund available to First Nations retailers on eligible on-reserve tobacco sales to First Nations individuals.

In conjunction with the PST rate reduction that became effective on October 28, 2006, tobacco tax rates increased from 17.5 cents to 18.3 cents per cigarette or gram of tobacco in order to maintain the price of tobacco products paid by consumers.

Tobacco Tax revenue increased \$24.9 million, or 15.1 per cent, due to one-time payments related to inventory build-ups and prior-year tax adjustments, increased tobacco tax rates that accompanied the PST rate reduction, higher-than-forecast tobacco consumption and lower-than-budgeted First Nations rebates.

Other Taxes

Other Taxes revenue includes Insurance Premiums Tax, Motor Vehicle Insurance Tax, Fire Prevention Tax, Pari-Mutuel Tax, and Succession Duties.

Crown Investments Corporation of Saskatchewan

The dividend from the Crown Investments Corporation (CIC) of Saskatchewan is based on CIC projected net earnings, which are paid to the General Revenue Fund (GRF).

The CIC dividend increased \$7.0 million, or 4.4 per cent, from the Budget Estimate in order to help the GRF fund the construction of a natural gas pipeline to La Ronge and Weyakwin.

Saskatchewan Liquor and Gaming Authority

The SLGA dividend to the GRF is based on the net income of the Authority. The SLGA is responsible for the distribution, operation and regulation of liquor and gaming activity in the Province. Dividends from SLGA consist of retail liquor net income, gaming (VLT) net income and Saskatchewan Indian and Gaming Authority (SIGA) net income.

The SLGA transfer to the GRF increased \$36.0 million, or 10.8 per cent, from the Budget Estimate. The increase is due to higher-than-anticipated net income from SIGA and the retail liquor segment, largely the result of higher economic activity and personal disposable income growth in 2006. SLGA also realized higher net income due to savings in its licencing, regulation and support activities as the result of less-than-budgeted charitable gaming grants and other miscellaneous savings.

Other Enterprises and Funds

Other Enterprises and Funds include dividends paid to the GRF by other government enterprises and special funds. This includes Saskatchewan Gaming Corporation net income and one-time dividends from other government entities.

Interest, Premium, Discount and Exchange

Revenue from this source includes interest received on bank deposits, sinking fund earnings and interest on advances, investments and accounts receivable.

Interest, premium, discount and exchange increased \$42.5 million, or 81.6 per cent, from the Budget Estimate. The increase is primarily due to higher-than-expected investment income on available working capital, including the Fiscal Stabilization Fund and the new Saskatchewan Infrastructure Fund, as well as higher sinking fund earnings.

Motor Vehicle Fees

Motor Vehicle Fees revenue includes licences, fees and registrations with respect to motor vehicles. Revenue is collected by Saskatchewan Government Insurance (SGI) on behalf of the Province and does not include any insurance portion of vehicle plating costs.

Motor vehicle fees increased \$10.2 million, or 7.9 per cent, from the Budget Estimate. The increase is primarily due to higher-than-anticipated economic activity across the province that led to increased revenue from vehicle registrations, driver's licences and fees collected from commercial trucks and buses under the International Registration Plan.

Other Licences and Permits

Other Licences and Permits revenue consists of fees collected under the International Fuel Tax Agreement (IFTA).

Sales, Services and Service Fees

Sales, Services and Service Fees revenue in the Department of Finance includes debt guarantee fees.

Other Other Revenue

Other Other revenue consists of all other recurring operational revenue not otherwise classified, and includes refunds of prior-years' expenditures, recovery of loans, transfers in and contributions by employees and others to retirement and insurance plans.

Canada Health Transfer

The Canada Health Transfer (CHT) assists provinces and territories in maintaining the national criteria and conditions in the *Canada Health Act*.

Funding for the CHT is made up of cash payments from the federal government and tax transfers to the provinces and territories. The Health Reform Transfer was included in the CHT transfer beginning April 2005.

Saskatchewan received \$716.8 million in CHT cash contributions from the federal government, \$44.0 million, or 5.8 per cent, below the Budget Estimate primarily due to changes in the value of tax points and revised population estimates.

Canada Social Transfer

The Canada Social Transfer (CST) assists provinces and territories in providing post-secondary education, social assistance and social services, including early childhood development and early learning and child care.

Funding for the CST is made up of cash payments from the federal government and tax transfers to the provinces and territories. Funding for the 2003 Multilateral Framework on Early Learning and Child Care is included in the CST.

Saskatchewan received \$323.6 million in CST cash contributions from the federal government, \$24.8 million, or 7.1 per cent, below the Budget Estimate primarily due to changes in the value of tax points and revised population estimates.

Equalization

Funding under the Equalization Program in 2006-07 was governed by the ability of a province to generate revenue relative to a five province standard (British Columbia, Saskatchewan, Manitoba, Ontario and Quebec). The principle behind this program is to compensate provinces that have a fiscal capacity below that of the standard provinces and to allow all provinces to provide reasonably comparable levels of service at reasonably comparable levels of taxation.

In 2004-05, Equalization was changed and an interim agreement established fixed provincial entitlements. Saskatchewan's share of the fixed envelope in 2006-07 was budgeted at zero, but revised federal calculations resulted in a \$12.7 million Equalization payment.

Other Transfers from the Federal Government

Other federal transfer revenue consists of a legislated subsidy from the Government of Canada, as well as various federal-provincial cost-sharing agreements.

In 2006-07, Saskatchewan's share of federal funding for public transit infrastructure, post-secondary education capital, affordable housing and off-reserve housing initiatives under Bill C-48 (\$108.1 million) was received by the Department of Finance and included in other federal transfers. This transfer was unbudgeted and accounts for the majority of the increase from Budget.

Revolving Funds

The Department is responsible for the Public Employees Benefits Agency Revolving Fund that provides services to public sector pension and benefit plans and to plan members. The costs incurred by the Fund for providing services are allocated to, and reimbursed primarily by, various pension and benefit plans. For more information about this Fund, please visit the following website: www.peba.gov.sk.ca/Agency/peba_ann_reports.html

Public Employees Benefits Agency

The Public Employees Benefits Agency (PEBA) provides the day-to-day administration of public sector pension and benefit programs.

PEBA's current strategic plan was formed in the 2005-06 fiscal year. It was reviewed in December 2006.

PEBA continued to provide research and guidance to pension and benefits boards to facilitate the documenting of each pension board's governance strategy. Good governance includes developing, documenting, implementing and abiding by policies and procedures that facilitate the efficient administration of pension and benefit plans. The documentation and ongoing review of governance is an expectation in the pension and benefit industry.

Combined, the pension, retirement and annuity fund have 63,000 members and 12,000 pensioners; and the benefit plans have 77,000 members. Individuals may be members of a pension plan and more than one benefit plan.

The Public Employees Benefits Agency administers the following pension and benefit plans:

Pension Programs

Anti-Tuberculosis League Employees Superannuation Plan

Judges of the Provincial Court Superannuation Plan

Liquor Board Superannuation Plan

The Members of the Legislative Assembly Benefits Act

Municipal Employees' Pension Plan

Public Employees Pension Plan

Public Service Superannuation Plan

Saskatchewan Pension Annuity Fund

Saskatchewan Transportation Company Employees Superannuation Plan

Workers' Compensation Board Superannuation Plan

Benefit Plans

Appendix D

Publications List

All Saskatchewan Finance publications can be accessed at:
www.gov.sk.ca/finance/publicationsall.htm

Department of Finance Annual Report

Offers a narrative and financial overview of the operations of the Department of Finance for the previous fiscal year and identifies actions for the upcoming fiscal year.

www.gov.sk.ca/finance/annreport

Performance Plan

The performance plan outlines the Department of Finance's vision for the future and the goals and objectives that the Department intends to accomplish over the medium to longer term. For each objective, a series of specific actions that will be taken in the coming year is presented, along with one or more performance measures, indicating how progress in achieving the objective will be tracked.

www.gov.sk.ca/finance/accountability/2006_2007/Finance.pdf

Budget Documents and Backgrounders

Offer financial details of the annual Provincial Budget. Published in March of each year. Main documents include the Budget Summary Book, Estimates and Supplementary Estimates.

www.gov.sk.ca/finance/budget

- **Budget Summary Book**

Offers an overall view of the Provincial Budget. Includes financial tables, as well as program highlights for the upcoming year.

- **Estimates**

The Estimates represent the Government's financial plan for the General Revenue Fund presented to the Legislative Assembly for the fiscal year commencing April 1, and ending on March 31 of the following year. The Estimates outline the estimated expenditures, revenues, loans, advances and investments of the General Revenue Fund categorized in a manner to inform both the Members of the Legislative Assembly and the public. The Estimates are presented in accordance with *The Financial Administration Act, 1993*.

- **Supplementary Estimates**

The Supplementary Estimates for the fiscal year ending March 31 represent funding provided by special warrants issued subsequent to the passage of the Main Appropriation Bill for the previous year. Supplementary Estimates are prepared and presented to the Legislative Assembly pursuant to section 14 of *The Financial Administration Act, 1993*.

First Quarter Report

Offers details of the Government's financial picture on a General Revenue Fund basis as of the first quarter (April, May, June) of the fiscal year, compared to Budget. Published within 60 days of end of first quarter.

www.gov.sk.ca/finance/QuarterReports

Mid-Year Report

Offers details of the Government's financial picture on a General Revenue Fund basis as of the second quarter (April - September) of the fiscal year, compared to Budget and First Quarter. Published within 60 days of end of second quarter.

www.gov.sk.ca/finance/finrep

Third Quarter Report

Offers details of the Government's financial picture on a General Revenue Fund basis as of the third quarter (April - December) of the fiscal year, compared to Budget and Mid-Year. Published within 60 days of end of third quarter.

www.gov.sk.ca/finance/QuarterReports/thirdquarter.htm

Public Accounts Documents

www.gov.sk.ca/finance/paccts

- **Volume 1**
Volume 1 of the Public Accounts contains the General Revenue Fund financial statements and the Summary financial statements. It also contains information on the Fiscal Stabilization Fund and the Province's debentures. Usually published in June/July.
- **Volume 2**
Volume 2 of the Public Accounts provides detailed information on revenues and expenses of the General Revenue Fund, information on the trust funds administered by the Government and a listing of remissions of taxes and fees. Usually published in September/October.
- **Compendium**
The Compendium contains the financial statements of various boards, agencies, commissions, pension plans, special purpose funds and institutions, as well as those Crown corporations which are accountable to Treasury Board.

Tax Information Bulletins and Forms

The Revenue Division of Saskatchewan Finance prepares a number of information bulletins and forms about the taxes and programs administered. This information explains how the Provincial Sales Tax, Fuel Tax, Tobacco Tax, Corporation Capital Tax, Liquor Consumption Tax, and other taxes apply in specific situations.

www.gov.sk.ca/finance/revenue

Financial Administration Manual

The Financial Administration Manual (FAM) communicates Treasury Board's policies and the Provincial Comptroller's directives to departments and public agencies. These financial policies and directives are made pursuant to *The Financial Administration Act, 1993*. FAM contains information to assist departments and public agencies in controlling, managing and accounting for government financial resources.

www.gov.sk.ca/finance/FAM/default.html

Natural Account Manual

The Natural Account Manual provides information on the asset, liability, equity, revenue and expense accounts available for use in MIDAS (the Government's central financial system).

www.gov.sk.ca/finance/nam/NaturalAccountManual.pdf

Frequently Asked Questions About Government Payment Authorities

Offers guidance about Government payment processes to those involved with initiating, approving or processing government payments. It is intended to be used by deputy ministers and other senior managers, program managers and executive directors/directors of administration and their staff.

www.gov.sk.ca/finance/faq/GovernmentPaymentAuthorities.pdf

Euro Medium-Term Note Prospectus

The EMTN Programme enables the Province to issue debt instruments in the European capital markets.

www.gov.sk.ca/finance/tdm/ProspectusFinal2004.pdf

Australian Medium-Term Note Information Memorandum

The AMTN Programme enables the Province to issue debt instruments in the Australian capital market.

www.gov.sk.ca/finance/tdm/AustralianMediumTermNote.pdf

Annual Report of the Province of Saskatchewan on Form 18K

The Annual Report is a disclosure document filed with the United States Securities and Exchange Commission, which provides an overview of the economic and fiscal position of the Province.

www.gov.sk.ca/finance/18k/18k2006.pdf

Saskatchewan Bureau of Statistics

www.stats.gov.sk.ca

- **Saskatchewan Economic Statistics**
Provides detailed data of the Saskatchewan economy in terms of Gross Domestic Product. Published twice annually.
- **Economic Overview**
Provides a compendium of the most asked questions relating to Saskatchewan statistics, including data on agriculture, business, employment, investment and Gross Domestic Product. Published annually.
- **Monthly Statistical Review**
Provides up-to-date economic and social statistics relating to Saskatchewan. Produced monthly.

- **Saskatchewan Fact Sheet**
Provides a snapshot of important Saskatchewan economic and social statistics for the previous two years. Produced annually.
- **Labour Force Survey**
Tables provide labour force and employment data from the Statistics Canada Labour Force Survey. Produced monthly.
- **Consumer Price Index**
Tables provide price data from the Statistics Canada Consumer Price Index. Produced monthly.

Public Employees Benefits Agency (PEBA)

PEBA operates as a central body within the Department of Finance, Government of Saskatchewan, to administer pension and benefit programs for employees of the Executive Government, Crown corporations and Government Funded Bodies.

www.peba.gov.sk.ca

- **PEBA Annual Reports**
Annual Reports provide information about the Plan's operations, membership, and administrative expenses and include financial statements for the year. PEBA produces 23 annual reports.
- **Acceptable Documentation**
This document outlines the documentation that PEBA will use in administering the pension and benefit programs that the Agency is responsible for.
- **Statement of Investment Policies (SIP&P)**
The following policy documents outline parameters around the investment of the various plans' assets setting rate of return standards, asset mix guidelines and risk tolerance. Documents are used by various fund managers to manage the plans' assets. The boards and commissions use this to evaluate the manager's performance.

Public Employees Pension Plan

- Investment Policy Summary (as of March 2007) – Balanced Fund
- Statement of Investment Policies and Goals – Balanced Fund
- Investment Policy Summary (as of March 2007) – Short-Term Bond Fund
- Statement of Investment Policies and Goals – Short-Term Bond Fund

The Saskatchewan Pension Annuity Fund

- Statement of Investment Policies and Goals (as of April 2006)

Municipal Employees' Pension Plan

- Investment Policy Summary (as of July 2006)
- Statement of Investment Policies and Procedures

Saskatchewan Liquor Board Superannuation Plan

- Investment Policy Summary (as of March 2007)
- Statement of Investment Policies and Objectives

• **Public Service Superannuation Plan (PSSP)**

Saskatchewan Transportation Company Superannuation Plan

- Investment Policy Summary (as of June 2006)
- Statement of Investment Policies and Goals

• **Benefits**

Public Employees Benefits Agency Disability Income Plan

- Investment Policy Summary (as of March 2006)
- Statement of Investment Policies and Objectives

Public Employees Benefits Agency Group Life Insurance Plan

- Investment Policy Summary (as of March 2006)
- Statement of Investment Policies and Objectives

• **Member Newsletters**

The newsletters provide current information to members about Plan provisions, proposed changes to legislation, regulations and administrative matters and address topics of interest to members (i.e., retirement planning, risk management, investments and the pension industry).

Public Employees Pension Plan (PEPP) – Pension Perspectives

(four times each fiscal year)

Municipal Employees' Pension Plan (MEPP) – MEPP Matters

(twice each fiscal year)

- **Member Booklets**

Member Booklets contain detailed information concerning the various plans offered and the benefits available to the members. These are a valuable resource to all Plan members, so that they know their exact entitlements under the various plans.

Pension Plans

- Public Employees Pension Plan
- Municipal Employees' Pension Plan
 - General Member
 - Designated Police Officer and Firefighter
- Public Service Superannuation Plan

Benefit Plans

- Public Employees Group Life
- Public Employees Disability Income Plan
 - Employee Booklet
 - Plan Document
- Public Employees Dental Plan
 - Maximum Reimbursement Schedules (MRS) – list the codes and the cost for each procedure that is covered in the Plan. The schedules are updated every year, usually in January.
- Public Employees Deferred Salary Leave Plan

Extended Health Care Booklets

- Extended Health Care Plan PS/GE SGEU Retiree Booklet
- Extended Health Care Plan CUPE 600-3 Retiree Booklet
- Extended Health Care Plan Out-of-scope Retiree Booklet
- Extended Health Care Plan Booklet PS/SGEU and CUPE 600-3: Effective January 1, 2000
- Extended Health Care Plan Booklet (Management) Employees: Effective January 1, 2000

- **Employer Bulletins**

Bulletins notify employers about legislation, regulations, and administrative changes affecting the Plan, as well as new services being offered to the members or procedural changes.

PEPP
PSSP
MEPP

- **Employer Administration Guides**

Assists employers in performing their responsibilities necessary for the administration of the Plan.

- **Pension Adjustment Guides**

Assists users in calculating and reporting Pension Adjustments.

MEPP
PSSP

- **Employer Manual (MEPP)**

Provides instructions to employers regarding administrative and reporting procedures.

- **Employer Defined Benefit Administration Guide**

Provides instructions to employers regarding administrative and reporting procedures.

- **Other Information**

Information Sheets

Provide detailed information on specific topics related to Plan provisions.

- PEPP *Talk*
- InfoSheets (PSSP)
- MEPP In-Depth

MEPP

- Actuarial Valuation of the Saskatchewan Municipal Employees' Pension Plan (as at December 31, 2005)
- Actuarial Valuation Report (as at December 31, 2005) on The Annuities Underwritten by The Municipal Employees' Pension Plan

Appendix E

Legislation

Under Order-in-Council No. 369/2007 dated May 17, 2007, the Minister of Finance is responsible for the following Acts of the Legislative Assembly:

Balanced Budget Act
Certified General Accountants Act, 1994
Certified Management Accountants Act
Certified Management Consultants Act
Chartered Accountants Act, 1986
Corporation Capital Tax Act
Federal-Provincial Agreements Act
Financial Administration Act, 1993
Fiscal Stabilization Fund Act
Fuel Tax Act, 2000
Home Energy Loan Act
Income Tax Act
Income Tax Act, 2000
Infrastructure Fund Act
Insurance Premiums Tax Act
Liquor Consumption Tax Act
Management Accountants Act
Members of the Legislative Assembly Benefits Act
Motor Vehicle Insurance Premiums Tax Act
Municipal Employees' Pension Act
Municipal Financing Corporation Act
Provincial Auditor Act
Provincial Sales Tax Act
Public Employees Pension Plan Act
Public Service Superannuation Act
Revenue and Financial Services Act
Saskatchewan Development Fund Act
Saskatchewan Pension Annuity Fund Act
Saskatchewan Pension Plan Act
Statistics Act
Superannuation (Supplementary Provisions) Act
Tabling of Documents Act, 1991
Tobacco Tax Act, 1998

Although not listed in the Order-in-Council, the Minister is also responsible for *The Appropriation Act*.

Furthermore, the Department has responsibilities under the following legislation:

Fire Prevention Act, 1992
Liquor Board Superannuation Act
Provincial Court Act, 1998
Public Health Act, 1994
Saskatchewan Assistance Act
Vehicle Administration Act

Appendix F

Treasury Board, the Budget Process and Public Accounts

Key decisions about the Province's finances, including the development of the annual Budget, are the responsibility of **Treasury Board**, a committee of Cabinet Ministers. The powers and duties of Treasury Board are contained in sections 4 and 5 of *The Financial Administration Act, 1993*. The Minister of Finance is the Chair of Treasury Board and the Deputy Minister of Finance is the Board's Secretary. Department of Finance staff act as a resource to Treasury Board in the performance of its duties.

The Department of Finance assists and supports Treasury Board in fulfilling its duties, which include:

- managing the Government's revenues, expenditures, assets and liabilities;
- evaluating Government programs and services;
- establishing and overseeing Government administrative policy and management practices and systems;
- developing and monitoring Government accounting policies and practices;
- reviewing and making recommendations on the organization of all or any part of Government;
- providing Cabinet with policy recommendations to address Government programming and fiscal issues; and,
- reviewing Budget proposals and overseeing the development of the Government's annual Budget.

One of the primary responsibilities of the Department of Finance is to assist Treasury Board in developing and managing the annual Provincial **Budget**. Presented each year in the Legislative Assembly by the Minister of Finance, the Budget sets forth in detail how public funds will be allocated among all government programs and services in the coming fiscal year. It also establishes future directions for government programs and appropriate levels of taxation to maintain those programs.

The process starts each spring with a Call for Plans, which directs departments to develop their strategic direction for the year, including goals, objectives, performance measures and key actions. Each year, Cabinet meets early in the fall to develop budget guidelines based on overall public priorities as determined by the Government. These guidelines are conveyed to departments to guide them when preparing their budget requests. Treasury Board, with the support and advice of the Department of Finance, assesses the plans and budget requests, evaluates competing priorities, and recommends a budget package to Cabinet.

Once Cabinet has finalized the budget package, the Department produces the Budget Address, annual Estimates and supporting materials and arranges for the dissemination of budget information to key stakeholders and the public.

Throughout the year, the Department of Finance issues First Quarter, Mid-Year and Third Quarter Reports, which update revenue, expenditure and debt forecasts based on economic changes and other developments that have occurred to certain points of the fiscal year. In addition, the Mid-Year Report updates actual performance compared to key commitments made in the Budget.

By August 1, the Department of Finance prepares the annual Public Accounts for the Minister of Finance to table in the Legislative Assembly. In effect, the **Public Accounts** serve as a fourth quarter report on the GRF. The Public Accounts summarize the results of Government operations for the fiscal year and provide a comparison of actual results to Budget Estimates.

The Legislative Assembly establishes a Standing Committee on Public Accounts at the beginning of each Legislative sitting to review the Government's expenditures through analysis of the Public Accounts and the Provincial Auditor's report. The Committee plays a key role in maintaining Government accountability.

The Committee is assisted in its deliberations by the attendance of the Provincial Comptroller, the Provincial Auditor and department officials, each of whom provides information and answers questions from Members.

The Committee summarizes its recommendations in periodic reports to the Legislative Assembly. The Department of Finance assists the Government in preparing a formal response describing the actions taken as a result of the Committee's recommendations. The financial accountability cycle is completed when the Committee reviews the Government's response and actions.

Appendix G

Glossary of Terms

Appropriation

An amount of funding that the Legislature has authorized for a particular purpose.

Credit Rating

An evaluation of the ability and willingness of a borrower to service and repay debt in a timely manner. Credit ratings are a key factor in determining the cost and availability of credit to a borrower. Borrowers with lower credit ratings pay more to lenders or investors than those with a higher rating. Many investors, such as pension funds, have guidelines restricting their lending to only those borrowers with above a minimum standard (level) credit rating.

Debt Servicing Costs

Costs associated with servicing the gross debt of the General Revenue Fund. The costs include interest, foreign exchange gains and losses, discounts, fees and commissions. Costs incurred to service Crown corporation debt are reimbursed by the Crown corporations.

Department

An organizational unit of Executive Government created for the purpose of managing related programs.

Estimates

Documents tabled outlining the Government's detailed financial plan for the year which form the basis for the requested appropriations. Estimates are tabled every year with the Budget Address.

Expenditure

The cost of operating government identified with a particular fiscal year or time period. Expenditures include the cost of government operated programs, interest on the public debt, transfer payments and capital acquisitions.

Financial System

Any system, manual or computerized, used to report or process transactions or data related to revenues, expenditures, assets or liabilities.

Fiscal Stabilization Fund (FSF)

The FSF was established April 1, 2000 by *The Fiscal Stabilization Fund Act*. Its purpose is to stabilize the fiscal position of the Government to facilitate long-term planning. Stabilization occurs through transfers between the FSF and the General Revenue Fund (GRF) as approved by Treasury Board. Transfers to the FSF from the GRF are statutory disbursements. Amounts transferred to the GRF from the FSF are available for expenditure subsequent to receiving required approval from the Legislative Assembly.

Fiscal Year

The period commencing on April 1 in one calendar year and ending on March 31 in the following calendar year.

General Revenue Fund (GRF)

The fund into which all revenues are paid, unless otherwise provided for by legislation, and from which all expenditures are appropriated by the Legislative Assembly.

General Revenue Fund Financial Statements

The financial statements prepared for the moneys appropriated by the Legislative Assembly.

Gross Debt

The gross debt of the Province consists of money owed directly to lenders through the sale of short-term promissory notes and medium and long-term debentures in the capital markets, as well as the amount owed to holders of Saskatchewan Savings Bonds.

Guaranteed Debt

The debt of Crown corporations and others that the Province has promised to repay if the debt issuer is unable to do so.

Performance Measurement

Performance measurement is a process of regularly assessing progress towards achieving the outcomes articulated in a strategic plan. Measurement results are analyzed, reported and the knowledge gained is used by the organization to modify and improve future plans.

Public Accounts

The Public Accounts of the Government of Saskatchewan are organized into two reports. Volume 1 contains the General Revenue Fund financial statements and the Summary financial statements. These are the main financial statements of the Government of Saskatchewan. Volume 2 contains details on revenue and expenditure of the General Revenue Fund, financial information on the superannuation and trust funds administered by the Government, and a listing of remissions of taxes and fees.

Public Performance Results Reporting

The mechanism that Government uses to communicate with the public on the achievements of departments for a specific time period, compared to the intended results laid out in pre-specified plans (typically at mid-year or at the end of a fiscal year). All departments are now required to prepare and report performance plans and results reports as part of their Annual Report.

Revenue

The gross proceeds applicable to a fiscal year from taxes, licences, transfer payments and sources other than borrowing.

Revolving Funds

Funds established by statute which are used to isolate certain items of related revenue and expenditure. Revolving funds are net budgeted in the Estimates, and are used for specific government operations that recover all or a portion of the associated costs from the funds' users.

Sinking Funds

Funds set aside to provide for the orderly retirement of a portion of the Province's debt.

Strategic Planning

Strategic planning is a practical, action-oriented process that sets goals and allocates resources to achieve meaningful results over time. Plans describe the outcomes that the organization intends to achieve over the planning period (goals and objectives) and the key actions that will be taken in the short term to move the organization toward its desired outcomes.

Summary Financial Statements

The financial statements that report on the consolidated financial resources and activities of all government organizations, including government boards, agencies, commissions, funds and Crown corporations.

Total Debt

The total debt of the General Revenue Fund consists of:

- gross debt – the amount of money owed to lenders; plus
- guaranteed debt – the debt of Crown corporations and others that the Province has promised to repay if they are unable to do so; less
- sinking funds – the amount of money which has been set aside for the repayment of debt.

Transfers

Transfers of money from the Government of Saskatchewan to an individual, organization, authority or other government for which no goods or services are directly received by Government and no repayment is expected in the future. Terms such as "grants" and "entitlements" are often used for transfers.

Transfers to Individuals

Direct or indirect transfers of money for which no public service is required of the recipient. These transfers provide the recipient with a financial benefit and are usually in the nature of income support, subsidy or compensation payment. These transfers may include public goods and services that are income tested.

Transfers for Public Service

Transfers to individuals, organizations, Crown corporations and local authorities (for example: school boards, district health boards and municipalities) to fund public services such as health care and education. Transfers to government organizations and corporations, which in turn provide a direct transfer or subsidy to their clients, are treated as a transfer to an individual.
