GRF – Statement of Borrowing Requirements .....	24
GRF – Statement of Debt .....	25
GRF – Statement of Guaranteed Debt .....	26

## **SUMMARY STATEMENT FINANCIAL TABLES**

Summary Statement of Surplus.....	28
Summary Statement of Debt .....	30

## Introduction

The province is continuing to enjoy a significant boom in 2007-08. The revised General Revenue Fund (GRF) financial position is now estimated to be as follows:

	<u>(millions)</u>
Revenue	\$9,108.2
Operating Expense	8,036.2
Operating Surplus	1,072.0
Debt Servicing	545.0
Pre-transfer Balance	527.0
FSF Transfer	(263.5)
SIF Transfer	0.0
<u>Surplus</u>	<u>\$ 263.5</u>

This represents an increase in revenues of approximately \$1.239 billion over budget, largely due to the following:

	<u>(millions)</u>
Taxes	\$408.0
Non-renewable resources	430.8
Other own source revenue	51.4
<u>Federal transfers</u>	<u>348.7</u>
<u>Total Revenue Increase</u>	<u>\$ 1,238.9</u>

The increase in federal transfers was largely reported in the First Quarter Report in response to the 2007-08 federal budget. Strong economic growth combined with retail spending is contributing to the tax increase, along with a significant prior year adjustment based on updated federal tax assessments reflecting stronger than previously recorded revenue for 2006-07.

The current forecast also reflects a fiscal year oil price forecast of US\$80 per barrel for West Texas Intermediate (WTI) crude oil.

Spending is up \$246.5 million over budget. Details are set out starting on page 14.

The GRF is now projecting a \$527 million surplus before transfers in or out of the Fiscal Stabilization Fund (FSF) and the Saskatchewan Infrastructure Fund (SIF). This is an improvement of \$1.007 billion from budget. Accordingly, the province is no longer forecasting to draw \$509.9 million out of the FSF as estimated at budget. Furthermore, the province is now setting aside one half of the pre-transfer surplus into the FSF to be available for future needs.

On a Summary Financial Statement basis, the province is now estimating a surplus of \$948.8 million, versus the \$701.3 million deficit estimated at budget, largely due to improvements to the GRF, FSF, SIF and sale of the province's interest in NewGrade.

The Mid-Year Report reflects the elimination of Provincial Sales Tax (PST) on eligible used vehicles announced effective November 8, 2007. The next update will be released after the third quarter.

# Economic Update

## INTRODUCTION

The 2007-08 Budget forecast 2.9 per cent real GDP growth for the province in 2007 and 2.6 per cent in 2008.

Overall, the provincial economy is in line with this previous forecast, with growth forecasts of 3.1 per cent this year and 2.7 per cent in 2008. This slight upward revision is primarily the result of larger-than-anticipated investment and consumption spending through the first several months of the year.

For the most part, commodity prices this year have ended up much higher than forecast in the 2007-08 Budget, resulting in a significant upward revision to the nominal growth forecast. The previous forecast was for 3.2 per cent growth in both 2007 and 2008. The current economic forecast is for 8.9 per cent growth in 2007 and 4.0 per cent in 2008.

Canadian growth is expected to be higher this year and next despite a more pronounced slowing of the U.S. economy. While the manufacturing sector is suffering from the effects of a stronger Canadian dollar and housing slump in the U.S., domestic demand remains strong.

One risk to the current growth forecast is the performance of the U.S. economy, which is now projected to slow to 2.1 per cent growth in 2007 and 2.9 per cent in 2008.

While Canadian, and in particular Saskatchewan, growth has seemingly not suffered significantly in recent months from the weakening U.S. economy, the sub-prime mortgage crisis in the U.S. is still playing itself out and the full effects may not yet be known.

## EXTERNAL CONDITIONS

### GLOBAL ECONOMIC OUTLOOK

The global economy expanded at a strong pace in the first three quarters of 2007, led by developing economies. The Bank of Canada is currently projecting global economic growth of around 5.2 per cent this year.

The Japanese and Euro zone economies are experiencing a bit of a slowdown in 2007 due to weak investment, yet

household spending and corporate profits remain positive. In China and emerging Asia, growth remains strong.

How the U.S. subprime mortgage crisis will impact the U.S. economy depends in large part on the resiliency of consumer spending. The evaporation of the wealth effect amid the current housing downturn has had an impact on consumer confidence. The recent lowering of U.S. interest rates should provide some level of offset. As well, the weaker US dollar is expected to boost U.S. net exports. U.S. real economic growth is currently projected to be 2.1 per cent in 2007 and 2.9 per cent in 2008.

Given current fundamentals, the Canadian economy is expected to remain sound this year and next despite some slowing of the U.S. economy.

Low unemployment, strong corporate and personal income growth, low interest rates and healthy government finances remain intact. Growth of 2.6 per cent and 2.7 per cent is expected in 2007 and 2008, respectively.

## CANADIAN DOLLAR VIS-À-VIS THE US DOLLAR

The Canadian dollar vis-à-vis the US dollar increased substantially of late, due primarily to U.S. interest rate cuts in the third quarter of this year, increases in the value of Canada's commodity exports, as well as a general weakening in the value of the US dollar.

While the Canadian dollar reached parity with the US dollar in mid-September and has been as high as 110 US cents, it has averaged 91.84 US cents in the first 10 months of 2007.

Assuming the exchange rate averages 101.30 US cents in the last two months of 2007 results in an annual average exchange rate of 93.40 US cents for the entire calendar year.

The Canadian dollar is anticipated to average 100.4 cents US in 2008 and 99.8 cents US in 2009 – essentially sustaining at or near parity for the next two years – significantly above the 2007-08 Budget assumption.

### CANADIAN AND U.S. ECONOMIC ASSUMPTIONS (Per cent Change Unless Noted Otherwise)

	2007-08 Budget			2007-08 Mid-Year		
	2007	2008	2009	2007	2008	2009
U.S. Real GDP	2.4	3.1	3.3	2.1	2.9	2.8
Canadian Real GDP	2.3	2.8	2.9	2.6	2.7	2.7
Canadian CPI	1.6	1.9	2.0	2.4	1.9	1.8
Canadian Interest Rates (%)						
Short-term	4.2	4.3	4.5	4.5	4.8	4.8
Long-term*	5.4	5.9	6.3	4.5	4.9	5.1
Canadian Dollar (US cents)	88.4	89.6	90.3	93.4	100.4	99.8

\* The long-term interest rates presented in the 2007-08 Budget were based on the Scotia long-term corporate bond rate which is no longer published by the Bank of Canada. The Mid-Year forecast thus uses the 10-Year Government of Canada bond rate.

## COMMODITY PRICE UPDATE

In the 2007-08 Budget, the price of West Texas Intermediate (WTI) oil was anticipated to average US\$58.75 per barrel in 2007 and US\$58.00 per barrel in 2008.

The price of natural gas has averaged \$6.33 per GJ through August of this year, \$0.21 per GJ more than what was assumed at Budget.

However, the price of natural gas has also come down of late.

## NON-RENEWABLE RESOURCE PRICES

	2007-08 Budget			2007-08 Mid-Year		
	2007	2008	2009	2007	2008	2009
WTI Oil (US\$/barrel)	58.75	58.00	55.00	71.90	78.00	68.00
Natural Gas (C\$/GJ)	6.12	6.25	6.20	6.06	6.48	6.35
Potash (C\$/tonne)	280.87	283.22	284.40	290.09	320.46	328.12

However, oil prices have actually averaged US\$68.14 per barrel in the first 10 months of 2007, with rising consumption, falling inventories, and moderate non-OPEC supply growth cited as the main contributing factors.

With prices recently exceeding US\$90 per barrel, the WTI oil price is expected to average US\$71.90 per barrel in 2007 and US\$78.00 per barrel in 2008.

Mild weather in the U.S. has allowed the volumes of natural gas in winter storage facilities to grow to above the five-year average. With above normal volumes in storage, the price of natural gas is anticipated to average \$6.06 per GJ in 2007 and \$6.48 per GJ in 2008.

Potash prices are anticipated to average \$290.09 per tonne in 2007 and \$320.46 per tonne in 2008.

## MAJOR CROP PRICES\*

	2007-08 Budget			2007-08 Mid-Year		
	2007	2008	2009	2007	2008	2009
Wheat (C\$/tonne)	130.00	143.86	159.97	222.38	212.49	202.61
Barley (C\$/tonne)	100.00	85.04	91.70	169.39	160.36	151.34
Canola (C\$/tonne)	300.00	247.98	257.88	388.00	374.31	360.61

\* Crop year basis

In the 2007-08 Budget, wheat prices were expected to average \$130.00 per tonne in 2007 and \$143.86 in 2008 while the price of barley was anticipated to average \$100.00 and \$85.04 per tonne, respectively.

Canola was projected to average \$300.00 per tonne in 2007 and \$247.98 per tonne in 2008.

Grain prices in general have tended to increase this past year due to droughts in Asia and Europe and the rapid increase in demand for corn in the U.S. for the production of ethanol.

The price of wheat is now expected to average \$222.38 in 2007 and the price of barley and canola are now expected to average \$169.39 and \$388.00 per tonne, respectively.

## SASKATCHEWAN ECONOMIC OUTLOOK

### OUTPUT GROWTH

The Saskatchewan Bureau of Statistics' Spring 2007 estimate for the Province's nominal and real GDP growth in 2006 was 5.7 per cent and 0.9 per cent, respectively. Statistics Canada's Spring 2007 estimates were 5.0 per cent and 0.4 per cent. However, Statistics Canada's revised estimate for 2006 nominal GDP and real GDP growth are 4.9 per cent and -0.4 per cent, respectively.

The nominal GDP growth forecast for 2007 is much higher than at Budget due primarily to higher commodity prices. The current forecast is for 8.9 per cent nominal GDP growth.

## FORECAST SUMMARY OF THE SASKATCHEWAN ECONOMY (Per Cent Change Unless Otherwise Noted)

	2006*	2007-08 Budget			2007-08 Mid-Year		
		2007	2008	2009	2007	2008	2009
Nominal GDP	5.7	3.2	3.2	2.7	8.9	4.0	2.4
Real GDP	0.9	2.9	2.6	2.4	3.1	2.7	2.6
CPI	2.1	1.8	1.8	1.8	2.7	1.9	1.8
Employment Growth (000s)	8.1	4.0	4.2	4.2	9.8	7.1	4.9
Unemployment Rate (%)	4.7	4.6	4.6	4.6	4.4	4.1	4.1

\* Actual

Source: Saskatchewan Bureau of Statistics

The 2007 real GDP growth forecast has been revised upwards from 2.9 per cent to 3.1 per cent.

Higher investment and consumption spending are the primary reasons for this upward revision. Imports, which are a subtraction in the calculation of GDP, are also higher.

The fact that higher investment and consumption spending are the main reasons for the upward revision to the growth forecast should not be much of a

surprise given current year-to-date data for the province's economy.

- The residential construction sector is booming, with housing starts through the first six months of this year up 73.4 per cent from one year ago.
- In addition, the value of building permits for the residential and commercial sectors through the first eight months of this year is up 82.7 per cent and 78.3 per cent, respectively, from the same period last year.

- Finally, while all of the categories of investment (government, residential and non-residential, and machinery and equipment) have increased, machinery and equipment investment has increased substantially, perhaps helped out by the strengthening Canadian dollar.

Strong consumption spending is also clearly supported by recent retail sales data.

- Through the first nine months of this year, the value of retail sales in Saskatchewan was 11.7 per cent higher than in the same period in 2006 – the fastest rate of growth among provinces.

At the same time, there are a couple of factors offsetting the effects of higher investment and consumption spending.

- Expected 2007 crop receipts are virtually unchanged from the Budget forecast, reflecting higher prices offsetting a smaller-than-expected crop volume. Saskatchewan Agriculture and Food's final crop report for this year indicated a 23.9 million tonne crop in 2007, essentially the same as the 23.8 million tonne crop in 2006, but well below the Budget assumption of 27.9 million tonnes.

- Production in the oil and gas sector is also lower in 2007 than was the case in 2006. Through July, the volume of oil production is down 0.3 per cent from the same period last year, while the volume of natural gas production is down 8.0 per cent.

The current growth forecast is consistent with the average of private sector forecasts.

### **2007 SASKATCHEWAN ECONOMIC INDICATORS (Per Cent Change Unless Noted Otherwise)**

<b>Indicators</b>	<b>Year-to-Date Change</b>	<b>January through</b>
Volume of Oil Production	-0.3	July
Value of Oil Sales	-2.0	July
Volume of Natural Gas Production	-8.0	July
Value of Natural Gas Sales	-6.9	July
Total Oil and Gas Wells Drilled	-7.8	September
Volume of Potash Production	51.6	July
Value of Potash Sales	71.3	June
Employment Growth (000s)	11.2	October
Unemployment Rate (%)	4.3	October
Value of Manufacturing Shipments	1.2	August
International Exports	7.0	August
Retail Sales	11.7	September
Wholesale Trade	17.3	August
New Vehicle Sales	15.9	August
Value of Building Permits	39.8	August
Housing Starts	73.4	June

On average, the private sector is forecasting 4.0 per cent growth this year, slowing a bit in 2008 and 2009 to 3.2 per cent and 2.8 per cent, respectively.

At the same time, the forecast for the province's unemployment rate has been revised downwards from 4.6 per cent to 4.4 per cent in 2007.

The average of the private sector forecasts is somewhat more optimistic about 2007 job growth and somewhat less optimistic about 2008 and 2009. However, both forecasts follow the general trend of lower employment growth in each of the next two years as the economy eases from its current pace of growth.

## EMPLOYMENT GROWTH

The employment growth forecast has increased from 4,000 jobs to 9,800 jobs in 2007 amid strong growth in trade, services and construction employment.

## PERSONAL INCOME AND REALIZED NET FARM INCOME

Robust employment and wage growth is anticipated to lead to considerable income gains over the forecast period.

For 2007, personal disposable income in the province is forecast to increase by 9.1 per cent, followed by 5.2 per cent and 5.7 per cent growth in 2008 and 2009, respectively.

Saskatchewan realized net farm income is forecast to increase to \$717 million this year, primarily due to strong crop prices.

The outlook for 2008 and 2009 is somewhat lower primarily due to rising operating costs.

## CONCLUSION

Saskatchewan's economy remains on a positive growth track. The current forecast is for 3.1 per cent and 2.7 per cent growth in 2007 and 2008, respectively.

The economic forecast is based on various assumptions, which might or might not end up holding over the course of the next year or so.

An average crop, in terms of quantity and quality, has been assumed.

The Canadian dollar is assumed to remain near record highs in the near term. If, on the other hand, it weakened, actual growth may end up higher given that Saskatchewan exports become more competitive in world markets as the value of the Canadian dollar decreases.

As well, unforeseen significant changes in energy prices could potentially have some impact on the growth forecast.

The forecast also assumes U.S. growth of 2.1 per cent and 2.9 per cent in 2007 and 2008, respectively.

However, the full effect of the U.S. sub-prime mortgage crisis is not yet realized.

A continuation of falling home prices, further job losses in housing related sectors like construction, real estate as well as financial services, could impact further on consumer spending, and thus U.S. growth.

# Financial Overview

## OVERVIEW

The 2007-08 Budget estimated a **General Revenue Fund** (GRF) surplus of \$75.0 million.

At mid-year:

- **revenue** is up \$1,238.9 million or 15.7 per cent from Budget (up \$848.5 million from 1<sup>st</sup> quarter);
- **operating expense** is up \$246.5 million or 3.2 per cent from Budget (up \$140.5 million from 1<sup>st</sup> quarter); and,
- **interest costs** are down \$15.0 million from Budget (down \$7.0 million from 1<sup>st</sup> quarter).

The resulting **pre-transfer balance** is a \$527.0 million surplus – a \$1,007.4 million turnaround from the Budget Estimate of a \$480.4 million pre-transfer deficit.

One-half of the pre-transfer surplus (\$263.5 million) will be transferred to the Fiscal Stabilization Fund (FSF) and the other half of the surplus – the \$263.5 million GRF surplus – will be used to reduce total debt.

On a **summary statement basis**, the current surplus forecast of \$948.8 million represents a significant improvement from the Budget deficit of \$701.3 million.

**Total debt** is down \$783.2 million from Budget (down \$40.9 million from 1<sup>st</sup> quarter), reflecting:

- a \$430.4 million decrease in **Government debt** from Budget (a \$30.7 million decrease from 1<sup>st</sup> quarter); and,
- a \$352.8 million decrease in **Crown corporation debt** from Budget (a \$10.2 million decrease from 1<sup>st</sup> quarter).

## 2007-08 GRF FORECAST OVERVIEW

(millions of dollars)	Budget Estimate	1st Quarter Forecast	Mid-Year Projection	Change from	
				Budget	1st Quarter
Revenue	\$ 7,869.3	\$ 8,259.7	\$ 9,108.2	\$ 1,238.9	\$ 848.5
Operating Expense	7,789.7	7,895.7	8,036.2	246.5	140.5
Operating Surplus	79.6	364.0	1,072.0	992.4	708.0
Debt Servicing	560.0	552.0	545.0	(15.0)	(7.0)
Pre-Transfer Balance	(480.4)	(188.0)	527.0	1,007.4	715.0
FSF Transfer	509.9	349.9	(263.5)	(773.4)	(613.4)
SIF Transfer	45.5	75.5	0.0	(45.5)	(75.5)
<b>Surplus</b>	<b>\$ 75.0</b>	<b>\$ 237.4</b>	<b>\$ 263.5</b>	<b>\$ 188.5</b>	<b>\$ 26.1</b>
<i>FSF Balance</i>	<i>\$ 377.6</i>	<i>537.6</i>	<i>1,151.0</i>	<i>773.4</i>	<i>613.4</i>
<i>SIF Balance</i>	<i>\$ 52.4</i>	<i>29.5</i>	<i>105.1</i>	<i>52.7</i>	<i>75.6</i>

## GRF REVENUE

Total GRF revenue is projected to be \$1,238.9 million, or 15.7 per cent, higher than the Budget estimate. Own-source revenue accounts for about 72 per cent of the total increase, or \$890.2 million, largely as the result of higher oil prices and income tax revenue. Transfers from the federal government are forecast to be \$348.7 million higher than anticipated.

**Taxation revenue** is projected to be up \$408.0 million compared to the Budget estimate. This increase is composed of:

- a \$361.0 million increase in Corporation and Individual Income Tax revenue. The increase primarily reflects stronger-than-anticipated assessment data for the 2006 tax year which will result in larger-than-forecast reconciliation payments for the previous tax year. Revised forecasts for personal taxable income growth and the corporate tax base in 2007 and 2008 have also been incorporated. Individual Income Tax is forecast to be up \$216.4 million and Corporation Income Tax is forecast to be up \$144.6 million;

- a \$62.0 million increase in Sales Tax revenue after accounting for the estimated fiscal impact of eliminating the PST on used cars and light-duty trucks. The overall increase in Sales Tax revenue reflects continued economic strength in the Saskatchewan economy; and,
- a \$15.0 million net decrease in all other tax revenue categories.

**Non-renewable resource revenue** is projected to be \$430.8 million higher than the Budget estimate. This increase takes into account the \$255.4 million increase projected at the end of the second quarter (September), as well as a further \$175.4 million forecast adjustment in order to incorporate increases in WTI oil prices and the value of the Canadian dollar since the end of September.

Specifically, the increase in non-renewable resource revenue is comprised of:

- a \$335.7 million increase in oil revenue due to higher prices and bonus bid revenue projected at the end of the second quarter.

### 2007-08 REVENUE CHANGE, BY CATEGORY

<i>(millions of dollars)</i>	Change	Total
<b>Budget Revenue Estimate</b>		<b>\$ 7,869.3</b>
<b>Revenue Forecast Changes</b>		
Taxes	+ 408.0	
Non-Renewable Resources	+ 430.8	
Other Own-Source (including Crown Entities)	+ 51.4	
Federal Transfers	+ 348.7	
<b>Total Change from Budget to Mid-Year</b>		<b>+ 1,238.9</b>
<b>Mid-Year Revenue Projection</b>		<b>\$ 9,108.2</b>

This includes a \$203.2 million increase in royalties and other oil revenue, as well as a \$132.5 million increase in bonus bid revenue;

- a \$14.8 million increase in other non-renewable resource revenue;
- a \$48.3 million decrease in potash revenue reflecting higher-than-expected capital spending due to anticipated mine expansions that outweighs higher prices and sales volumes;
- a \$46.8 million decrease in natural gas revenue due to lower prices and production. The average fiscal-year price for natural gas has fallen from \$6.20 per GJ at Budget to the current forecast of \$6.00 per GJ; and,
- a \$175.4 million net increase in GRF revenue in order to account for higher oil prices and exchange rate since the end of September.

WTI oil prices averaged US\$70.21 per barrel over the April to September period. Based on the assumption that world oil prices would moderate over the last half of the fiscal year, as was the case in 2006-07, the second-quarter price forecast of US\$68.55 per barrel was reasonable at the end of the second quarter.

However, oil prices averaged US\$85.66 per barrel in October and well over US\$90.00 in the first half of November. Accordingly, the current revenue forecast has been adjusted to include an average price of US\$80.00 per barrel in 2007-08.

This is projected to result in an extra \$229.0 million in GRF revenue.

The 2007-08 exchange rate forecast was 95.11 US cents at the close of the second quarter. The Canadian dollar averaged 93.32 US cents over the April to September period and, as a result, this forecast was reasonable at the end of the second quarter.

Since then, however, the exchange rate has increased significantly and

maintained a trading value above par with the US dollar. The exchange rate averaged 97.6 US cents in October and approximately 104.0 US cents in the first half of November.

Therefore, the current exchange rate forecast has been revised to 97.25 US cents for 2007-08. This is projected to result in a \$53.6 million reduction in GRF revenue.

The total impact of these two forecast adjustments made since the end of the second quarter is estimated to be \$175 million. The third quarter revenue forecast will incorporate further revisions to the forecasts for WTI oil prices and the exchange rate as more data becomes available.

**Other own-source revenue** (including transfers from Crown Entities) is projected to be \$51.4 million higher than the Budget estimate due to:

- a \$13.5 million increase in SLGA net income, reflecting economic strength and higher SIGA net income;
- a \$10.0 million increase in interest, premium, discount and exchange earnings, primarily reflecting higher-than-expected interest income on available working capital; and,
- a \$27.9 million net increase in all other own-source revenue sources.

**Federal transfers** are projected to be \$348.7 million higher than the Budget estimate. The federal budget was released three days prior to the release of the Saskatchewan Budget and contained

significant announcements that impacted 2007-08 GRF revenue, including Equalization reform. These announcements were not able to be incorporated into Saskatchewan's Budget, but they were accounted for in the First Quarter Financial Report.

This increase since Budget is due to:

- a \$226.1 million increase in Equalization;
- a \$130.7 million increase in other federal transfers, largely due to the receipt of one-time funding for health, labour market, child care and environmental initiatives announced in the federal budget (\$104.0 million); partially offset by,
- an \$8.1 million decrease in CHT and CST payments.

## GRF OPERATING EXPENSE

At mid-year, operating expense is projected to be \$246.5 million above budget. The majority of the change is in the following areas.

- **Learning – Teachers’ Pensions and Benefits** is up \$52.2 million from budget, primarily due to increased requirements for GRF funding for the Teachers’ Superannuation Plan as a result of actuarial information and expected utilization and rate changes. The Teachers’ Extended Health Plan also requires additional funding resulting from the teachers’ collective agreement settlement.
- **Corrections and Public Safety** is up \$30.3 million from budget, primarily due to an increase in eligible claims under the Provincial Disaster Assistance Program, an increase in inmate bed space capacity and additional cost to sustain the SaskTel FleetNet System pending wind-down, while a replacement system is built.
- **Learning** is up \$28.2 million from budget, primarily due to raising the education property tax credit on residential and commercial property, the teachers’ collective agreement settlement and unbudgeted funding provided by the federal government for Early Learning and Child Care initiatives.
- **Health** is up \$28.1 million from budget, primarily due to increased funding to improve workplace safety, worker recruitment and retention in the health sector, as well as patient wait time guarantee investments.
- **Industry and Resources** is up \$27.8 million from budget, primarily due to funds received from EnCana pursuant to the October, 2007 agreement on decommissioning and reclaiming the Lorado uranium mine site, commitment to Doepker Industries, support for the Hydrogen Technologies Corporation PureEnergy project and funding for a University of Regina professorship in petroleum-coke gasification.
- **Highways and Transportation** is up \$17.9 million from budget, primarily due to emergency work related to spring flooding and public safety repairs.
- **Culture, Youth and Recreation** is up \$14.0 million from budget, primarily due to an increase in the Film Employment Tax Credit program and increased funding for the Saskatchewan Arts Board, Western Development Museum and projects under the Building Communities Program.
- **First Nations and Métis Relations** is up \$13.2 million from budget, primarily due to higher-than-anticipated payments to the First Nations Trust and Community Development Corporations based on higher Saskatchewan Indian Gaming Authority net income in 2006-07 and 2007-08, as well as additional funding for the First Nations Trust as a result of amendments to the Gaming Framework Agreement.

- **Advanced Education and Employment** is up \$11.5 million from budget, primarily due to training facilities capital transfers provided under the federal-provincial Labour Market Partnership Agreement, funding provided for one-time capital to support training opportunities for health professionals and increased funding for InterVac.
- **Chief Electoral Officer** is up \$9.7 million from budget primarily due to the estimated cost of the general election.
- **Public Service Commission (PSC)** is up \$9.4 million from budget, primarily due to the transfer of Human Resource functions to the PSC, and is fully offset by reductions in other departments' expense, and an increase related to the single-window human resource administration and payroll service delivery project.
- **Justice** is up \$4.5 million from budget, primarily due to increased RCMP compensation and operating costs as well as new community safety programming.
- **Northern Affairs** is up \$4.5 million from budget, primarily due to one-time funding for the Primrose Lake economic development trust fund.

#### 2007-08 OPERATING EXPENSE CHANGE, BY DEPARTMENT

<i>(millions of dollars)</i>	Change	Total
<b>Budget Operating Expense</b>		<b>\$ 7,789.7</b>
<b>Operating Expense Forecast Changes</b>		
Learning – Teachers' Pensions and Benefits	+ 52.2	
Corrections and Public Safety	+ 30.3	
Learning	+ 28.2	
Health	+ 28.1	
Industry and Resources	+ 27.8

Culture, Youth and Recreation	+ 14.0	
First Nations and Métis Relations	+ 13.2	
Advanced Education and Employment	+ 11.5	
Chief Electoral Officer	+ 9.7	
Public Service Commission	+ 9.4	
Justice	+ 4.5	
Northern Affairs	+ 4.5	
Finance – Public Service Pensions and Benefits	+ 3.7	
Environment	- 8.3	
Community Resources	- 1.2	
Other Net Changes	+ 1.0	
<b>Total Change from Budget to Mid-Year</b>		<b>+ 246.5</b>
<b>Mid-Year Operating Expense Projection</b>		<b>\$ 8,036.2</b>

- **Finance – Public Service Pensions and Benefits** is up \$3.7 million from budget, primarily due to higher-than-expected salaries across government.
- **Environment** is down \$8.3 million from budget primarily due to a decrease in forest fire management costs as the result of a below-average fire season, partially offset by emergency relief efforts at Fishing Lake and Waldsea Lake.
- **Community Resources** is down \$1.2 million from budget, primarily due to lower-than-expected Transitional Employment Allowance expenses and delays in staffing new positions added in the 2007-08 Budget, partially offset by increased spending for Vulnerable Children and Families and increased Saskatchewan Assistance Plan spending, mainly related to a shelter rate increase.

## INTEREST COSTS

At mid-year, interest costs are projected to be down \$15.0 million from budget, primarily due to:

- the application of the 2006-07 surplus to debt reduction;
- savings due to the increase in the value of the Canadian dollar; and,
- lower-than-anticipated in-year borrowing costs.

## FISCAL STABILIZATION FUND

The 2007-08 Budget relied on a transfer of \$509.9 million from the FSF to the GRF.

The mid-year projection allows the GRF to be balanced without reliance on a transfer from the FSF.

At the same time, one-half of the pre-transfer GRF balance was transferred from the GRF to the FSF, bringing the projected year-end balance in the FSF to \$1,151.0 million.

The balance remaining in the FSF at the end of 2007-08 will be combined with the balance remaining in the SIF and moved to the Growth and Financial Security Fund in accordance with legislation to be introduced in the fall session.

## SASKATCHEWAN INFRASTRUCTURE FUND

The 2007-08 Budget included a transfer of \$45.5 million from the SIF.

The mid-year projection eliminates the transfer from the SIF to the GRF for the Building Communities program and for municipal infrastructure – effectively funding these items from the GRF rather than from the SIF.

As a result, the 2007-08 year-end balance in the SIF is projected to be \$105.1 million.

## SUMMARY STATEMENT OF SURPLUS

The 2007-08 summary statement balance is currently forecast to be a surplus of \$948.8 million, an improvement of \$1,650.1 million from the budgeted deficit of \$701.3 million.

# Borrowing and Debt

## GENERAL REVENUE FUND DEBT

The GRF borrows for government and Crown corporations.

Public debt as reported in the Province's financial statements is comprised of:

- Gross Debt – the amount of money owed to lenders; less
- Sinking Funds – the amount of money which has been set aside for the repayment of debt.

Total debt, or public debt plus guaranteed debt, is used by most members of the financial community when analyzing creditworthiness.

- Guaranteed Debt – the debt of Crown corporations and others that the Province has promised to repay if they are unable to do so.

Total debt is used in this Report. As shown below, the total debt of the GRF at March 31, 2008 is currently projected to be \$783.2 million less than estimated in the Budget.

Crown corporations are responsible for the principal and interest payments on their debt. Crown corporation debt is incurred in the normal course of business, primarily for investment in infrastructure and business development initiatives which provide revenue streams to service the debt. Crown corporation debt is forecast to be \$352.8 million lower than estimated in the Budget.

Government debt at March 31, 2008 is currently forecast to be \$430.4 million lower than estimated in the Budget. This decrease is primarily due to a larger surplus in 2007-08 and the dedication of the 2006-07 surplus to debt reduction.

## SUMMARY OF TOTAL DEBT As at March 31, 2008

<i>(millions of dollars)</i>	Budget Estimate	1st Quarter Forecast	Mid-Year Projection	Mid-Year Change from Budget
Crown Corporation Debt	\$ 3,820.0	\$ 3,477.4	\$ 3,467.2	\$ (352.8)

## **BORROWING**

The Province borrows through the sale of securities in capital markets and through the sale of savings bonds to Saskatchewan residents.

The Province's 2007-08 borrowing requirements are projected to be \$720.7 million, \$565.7 million lower than estimated in the Budget due to lower requirements for government purposes (\$219.5 million) and for Crown corporations (\$346.2 million).

## **SUMMARY STATEMENT OF TOTAL DEBT**

GRF total debt includes all debt borrowed or guaranteed by the GRF for either government purposes or the purposes of certain Crown corporations. Some Crown corporations and other organizations have obligations to other entities, either by borrowing directly or by guaranteeing the debt of others.

The GRF is not responsible for this other debt. The Summary Statement of Debt on page 30 calculates the total debt of government entities by listing both GRF debt and other debt.

**SUMMARY OF TOTAL DEBT**  
**As at March 31, 2008**

<i>(millions of dollars)</i>	<b>Budget Estimate</b>	<b>Mid-Year Projection</b>	<b>Mid-Year Change from Budget</b>
