

Fish and Wildlife Development Fund Funding Application Form

January 2023 | CSB | CSB24001

A. Information/Background

Saskatchewan hunters, anglers and trappers recognize that healthy and diverse wildlife populations are a barometer of the ecosystem. Their responsible conservation ethic and love of nature are making positive and vital contributions to the management and preservation of fish and wildlife populations and habitat. This ensures that habitat, and thereby fish and wildlife, are preserved for everyone to enjoy. The Fish and Wildlife Development Fund (FWDF) was created when these users offered to pay more for hunting and angling licences, provided the extra money was put into a special fund to conserve and enhance fish and wildlife. The FWDF now receives 30% of the revenue generated from all fur, angling and hunting licences sold in the province.

While the FWDF supports many types of projects related to fish, wildlife, fur and habitat, priority is given to those projects directly applicable to game species. The FWDF will accept applications for multi-year projects, however funding will only be considered for a single-year term. Applicants with multiyear projects must apply in each year they wish to be considered for funding. Future funding will be contingent on a

final report (see 'Final Report Form') being provided by March 1 of the year following application approval.

Please note that the applicant (Primary Contact) must not have any outstanding obligations regarding Research Permit requirements (ie. data submissions) in order to be considered.

Please submit your digital application to
dushantha.pathiranage@gov.sk.ca.

Please note that NO additional material will be considered in the review process for funding. Applications will be accepted from January 1 to January 31.

Hard copies can also be mailed to:
