

Industry Tip

Unable to Enter 'Rig #' when Editing or Reporting Subsequent Drilling Activity

Date	Module/Application/Functionality	Notes
August 4, 2016	Well and Facility Infrastructure Module: Drilling and Completion	Initial Release

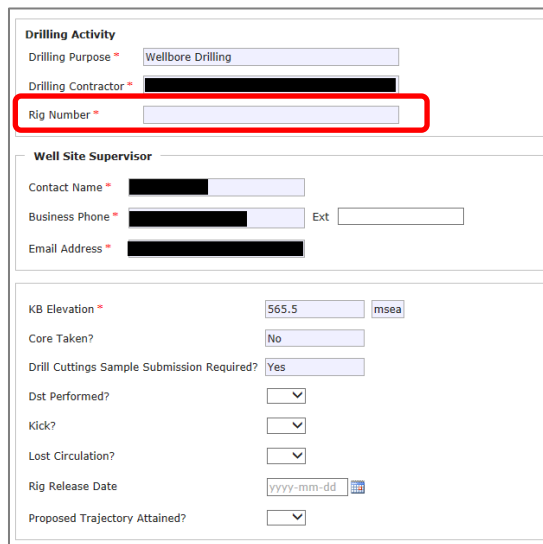

An issue has been identified where industry is unable to enter a 'Rig #' when editing or submitting additional drilling information in IRIS.

Note: This issue only impacts users that are editing or submitting detail for an existing drilling activity record in IRIS; it does not impact net new immediate drilling activity entries.

Description of Scenario

As part of IRIS Release 5.3, 'Rig #' was introduced as a mandatory field to the drilling activity tab, part of the 'Drilling and Completion' reporting functionality (Infrastructure>Search/Submit>Immediate Reporting>Drilling and Completion).

When a user goes into IRIS to edit the data or to report subsequent drilling information (for example data required within 7-days, 30-days or 90 days of drilling activity), IRIS requires the 'Rig #' before the user can save the record. However, due to an issue in IRIS, the user is unable to enter the 'Rig #' or 'N/A'; the field is greyed-out, indicating the user can't enter information.

Drilling Activity

Drilling Purpose * Wellbore Drilling

Drilling Contractor * [REDACTED]

Rig Number * [REDACTED]

Well Site Supervisor

Contact Name * [REDACTED]

Business Phone * [REDACTED] Ext [REDACTED]

Email Address * [REDACTED]

KB Elevation * 565.5 msea

Core Taken? No

Drill Cuttings Sample Submission Required? Yes

Dst Performed? [REDACTED]

Kick? [REDACTED]

Lost Circulation? [REDACTED]

Rig Release Date yyyy-mm-dd [REDACTED]

Proposed Trajectory Attained? [REDACTED]

As a result, the user receives this error and the record can't be saved.

The screenshot shows a web application window titled "Edit Drilling Activity". The form contains several sections: "Well CWI" (with a redacted field), "Drilling Activity" (with fields for "Drilling Purpose" (Wellbore Drilling), "Drilling Contractor" (redacted), and "Rig Number" (empty)), "Well Site Supervisor" (with fields for "Contact Name" (redacted), "Business Phone" (redacted), "Ext" (empty), and "Email Address" (redacted)), and a section for "KB Elevation" (565.5 msea), "Core Taken?" (No), "Drill Cuttings Sample Submission Required?" (Yes), "Dst Performed?" (Yes), "Kick?" (dropdown), "Lost Circulation?" (dropdown), "Rig Release Date" (calendar icon), and "Proposed Trajectory Attained?" (dropdown). At the bottom right, there are "Discard Changes" and "Save" buttons. An error message box is overlaid on the top right, stating: "The Rig Number is required. If no Rig Number is available, enter 'N/A'." The error message box is highlighted with a red rectangle.

Action Required and Workaround

If you're attempting to edit or provide subsequent drilling activity information and encounter the scenario described above, contact Petroleum and Natural Gas Support at 1-855-219-9373 or PNG.support@gov.sk.ca. Ministry of the Economy employees can add the rig information on the industry user's behalf.

In the meantime, ECON is investigating the issue and will notify industry in the Alerts and Notifications section of www.saskatchewan.ca/IRIS when the issue has been resolved.
